A NEW TRANSPORTATION FUTURE FOR CONTRA COSTA COUNTY

TRANSPORTATION EXPENDITURE PLAN FUNDING SUMMARY

The Contra Costa Transportation Authority (CCTA) envisions a future where all of our transportation systems work together for more streamlined, safe, efficient, and convenient travel. We envision strong cooperation and mutual support across all of Contra Costa's cities, towns, and communities to make it easier for people in Contra Costa County to get around. We envision transportation networks that support a healthy environment and protect Contra Costa County's unique landscapes.

This 2020 Transportation Expenditure Plan (TEP) focuses on innovative strategies and new technologies that will relieve congestion, promote a strong economy, protect the environment, and enhance the quality of life for all of Contra Costa County's diverse communities. In order to offer a wide range of transportation options, CCTA will continue to deliver projects that integrate and optimize transit and vehicular travel in a more balanced way. This plan outlines projects that will achieve a broad range of goals:

- **Relieve Traffic Congestion on Highways and Interchanges.** CCTA's goal is to improve the movement of people and goods through major corridors, to address bottlenecks and hot spots, and to make commutes smoother and more predictable. Contra Costa County's residents and travelers will see smoother traffic flow and less congestion with the implementation of this TEP.
- **Make Bus, Ferry, Passenger Train, and BART Safer, Cleaner, and More Reliable.** Contra Costa County's residents and travelers value safe, clean, convenient, and affordable transit options. CCTA's goal is to support transit operators in providing more frequent and reliable transit service and to plan and build the infrastructure that enables travelers to make quick and convenient transit connections between their homes, work, and recreational activities.
- **Provide Affordable and Safe Transportation for Children, Seniors, Veterans, and People with Disabilities.** CCTA is committed to supporting mobility and transportation options for all Contra Costa County residents.
- **Improve Transportation in Our Communities.** CCTA supports livable communities and quality of life in Contra Costa County by providing local cities and towns with funding to fix and modernize local streets, offer safer places to walk and cycle, and improve air quality. CCTA also helps manage urban sprawl through its transportation-related growth policies.

For planning purposes, CCTA divides the county into four subregions: central, east, southwest, and west. The TEP is intentionally designed to be equitable across all subregions based on the number of people who live in each subregion. **All locally generated transportation revenue—plus any additional grant funding CCTA receives—will be spent on local projects in Contra Costa County.**

EXPENDITURE PLAN SUMMARY

FUNDING CATEGORIES	SUBTOTALS	
	\$ (millions)*	%
RELIEVING CONGESTION ON HIGHWAYS, INTERCHANGES, AND MAJOR ROADS	\$1408	
Improve State Route 242 (SR-242), Highway 4, and eBART Corridor		
Relieve Congestion and Improve Access to Jobs Along Highway 4 and SR-242	200	6.5
Improve Local Access to Highway 4 and Byron Airport	150	4.9
East County Transit Extension to Brentwood and Connectivity to Transit, Rail, and Parking	100	3.3
Improve Traffic Flow on Major Roads in East County	75	2.5
Enhance Ferry Service and Commuter Rail in East and Central County	50	1.6
Improve Transit Reliability Along SR-242, Highway 4, and Vasco Road	50	1.6
Seamless Connected Transportation Options	36	1.2
Additional eBART Trains Cars	28	0.9
Modernize I-680, Highway 24, and BART Corridor		
Relieve Congestion, Ease Bottlenecks, and Improve Local Access Along the I-680 Corridor	200	6.5
Improve Traffic Flow on Major Roads in the Central County and Lamorinda	103	3.4
Improve Transit Reliability along the I-680 and Highway 24 Corridors	50	1.6
Provide Greater Access to BART Stations Along I-680 and Highway 24	49	1.6
Seamless Connected Transportation Options	36	1.2
Improve Traffic Flow on Highway 24 and Modernize the Old Bores of Caldecott Tunnel	35	1.1
Improve Traffic Flow on Major Roads in San Ramon Valley	20	0.6
Upgrade I-80, I-580 (Richmond-San Rafael Bridge), and BART Corridor		
Improve Transit Reliability Along the I-80 Corridor	90	3.0
Relieve Congestion and Improve Local Access Along the I-80 Corridor	57	1.9
Enhance Ferry Service and Commuter Rail in West County	34	1.1
Improved Traffic Flow and Local Access to Richmond-San Rafael Bridge Along I-580 and Richmond Parkway	19	0.6
Seamless Connected Transportation Options	16	0.5
Improve Traffic Flow on Major Roads in West County	10	0.3
IMPROVING TRANSPORTATION COUNTYWIDE IN ALL OUR COMMUNITIES	\$1530	
Modernize Local Roads and Improve Access to Job Centers and Housing	532	17.4
Improve Walking and Biking on Streets and Trails	215	7.0
Provide Convenient and Reliable Transit Services in Central, East, and Southwest Contra Costa	192	6.3
Increase Bus Services and Reliability in West Contra Costa	187	6.1
Affordable Transportation for Seniors, Veterans, and People with Disabilities	154	5.0
Cleaner, Safer BART	120	3.9
Safe Transportation for Youth and Students	87	2.9
Reduce Emissions and Improve Air Quality	43	1.4
SUBTOTAL	\$2938	96%
Transportation Planning, Facilities & Services	\$92	3.0
Administration	\$31	1.0
TOTAL	\$3061	100%

*Funding amounts are rounded

WHAT THESE PROJECTS MEAN FOR CONTRA COSTA COUNTY

The investments described in this TEP have been carefully selected to offer a broad array of tangible benefits to the residents and travelers in Contra Costa County. Here are just a few:

- » Smooth-flowing traffic along highways and roads
- » Quicker trips and less time sitting in traffic
- » Smoother pavement and fewer potholes
- » Transit, where and when it's needed
- » Easier ways to get from home or work to transit stops and back home again
- » Cleaner air due to reduced vehicle emissions
- » More bicycle lanes and walking paths to support an active lifestyle
- » Free or reduced transit fares for students

THREE DECADES OF TRANSPORTATION IMPROVEMENTS

WHO WE ARE AND WHAT WE DO

Contra Costa Transportation Authority (CCTA) is responsible for **maintaining and improving the county's transportation system by planning, funding, and delivering critical transportation projects that connect our communities**, foster a strong economy, increase sustainability, and safely and efficiently get people where they need to go. CCTA is also responsible for putting solutions in place to help manage traffic by providing and connecting a wide range of transportation options.

We are proud of our accomplishments and we also recognize the immense transportation challenges still faced by county residents and businesses—particularly considering population growth, continued development, and threats to the environment. CCTA works to advance transportation solutions, ease congestion, and prepare Contra Costa County for safe future mobility.

CCTA is evolving with the times and presenting innovative solutions while protecting the qualities that make Contra Costa a wonderful place to call home. We present this Transportation Expenditure Plan (TEP), which reflects where we are now and, more importantly, our commitment to pursuing transportation policies, planning, and investments that will get us to where we want to be in the future.

FULFILLING OUR PROMISE TO CONTRA COSTA COUNTY VOTERS

Contra Costa County voters passed **Measure C** in 1988 sending a clear message that recognized the immense need to improve the way people travel around Contra Costa County. Voters authorized a 20-year (1989-2009) half-cent transportation sales tax to finance improvements to the county's overburdened transportation infrastructure. In 1989, the CCTA was born.

Measure C expired in 2009 but much was accomplished including Highway 4 widening from Hercules to Martinez; BART extension to Pittsburg/Bay Point; Richmond Parkway construction; and new transit programs for seniors and people with disabilities.

In 2004, Contra Costa County voters approved **Measure J**. The measure provided for the continuation of the county's half-cent transportation sales tax for 25 more years (2009-2034) beyond the Measure C expiration date. Without Measures C and J funding, CCTA would not have qualified to receive additional federal, state, or regional funds. With a total of \$1.4 billion in Measure C and J project funds, a total of more than \$5.5 billion will be invested in vital transportation projects in Contra Costa County through 2034, leveraging Measure C and J funding at about a three-to-one ratio.

CCTA has delivered most of the major infrastructure improvements projects in Measure J—such as the fourth bore of the Caldecott Tunnels, Highway 4 East widening, eBART extension from the Pittsburg/Bay Point BART station to Antioch and I-680 and I-80 corridor improvements—on an accelerated timeline to deliver its promises to voters. CCTA periodically issues bonds to provide advance funding to design and build major infrastructure projects. Then, the revenue generated from the transportation sales tax is used to pay back the bonds. By turning future Measure J revenue into capital dollars and accelerating design and construction, transportation projects are put into place sooner to alleviate transportation challenges. Designing and building the projects earlier costs less money, because the added cost of future inflation is avoided.

As of 2018, about 80 percent of the Measure J project funds were expended. Remaining revenues are now going toward repayment of bonds, fixing local streets, continuing programs, and supporting public transportation. Without a new TEP, the county will be unable to fund any new major projects to address pressing mobility needs.

TRANSPORTATION FOR THE NEXT THREE DECADES

While the existing Measure J will remain intact through 2034, this new TEP has been developed for several reasons:

- All of the planned major capital improvement projects funded by Measure J are either complete or in construction, ahead of schedule.
- New transportation technology is offering unprecedented opportunities to streamline travel and traffic, and reduce emissions.
- The gap between transportation needs and available funding is at an all-time high. The new TEP will allow local funding to keep needed services in place and alleviate congestion by attracting other funding sources.

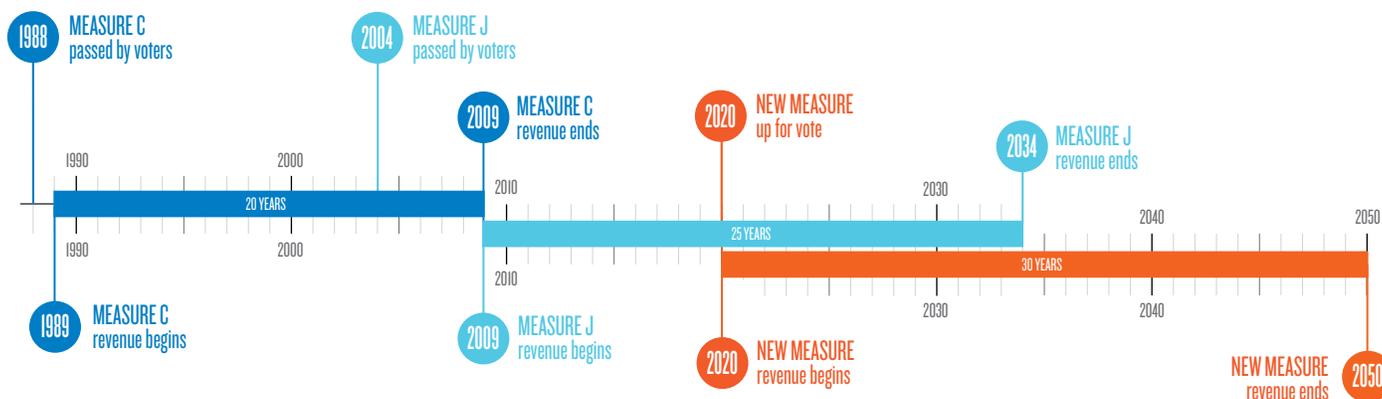

- The demand on Contra Costa County's roads, highways, BART stations, and buses is increasing. The county's population is growing and more people are using roads and transit. Investments are needed to maintain and improve the current transportation system to ensure it can effectively accommodate growth and prepare the system for the future.
- People are increasingly valuing alternative ways to get around, such as transit, walking and biking. Our roads need to safely accommodate all users.
- Contra Costa County's population is aging. Currently, about 14 percent of the population is age 65 or older.* By 2035, this population is expected to double to about 30 percent. New and different transportation solutions are needed to keep our older residents mobile and maintain quality of life.

LOCAL FUNDING FOR LOCAL PROJECTS

Measures C and J local transportation sales taxes have provided a substantial and steady share of the total funding available for transportation projects in Contra Costa County. State and federal sources have targeted some major projects, but local funding is needed to attract and supplement those sources. Our local transportation sales tax has been indispensable in helping to meet the county's growing needs in an era of unpredictable resources.

* Population based on Association of Bay Area Governments (ABAG) Projections 2013

Timeline of Local Funding Contra Costa County Transportation Improvements

The funding for this TEP will augment the existing Contra Costa County Measure J half-cent transportation sales tax by a half-cent until Measure J expires in 2034, then continue the half-cent transportation sales tax until 2050. A sales tax will generate approximately \$3 billion for essential transportation improvements that touch every city, town, and community in Contra Costa County.

These local funds have allowed CCTA to compete effectively for outside funds by providing a local matching fund source, as required by most grants. Measures C and J, for example, will attract \$4.1 billion of additional funds for Contra Costa County transportation projects through 2034, providing a total investment of \$5.5 billion in vital transportation improvements.

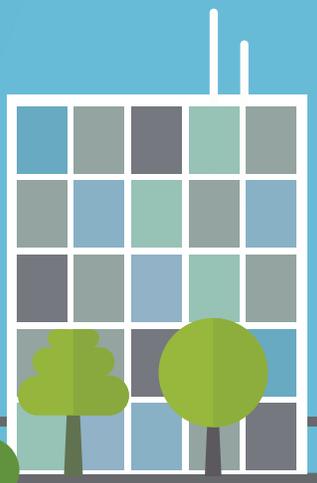

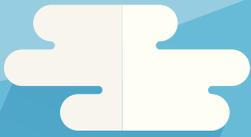

CCTA will continue to use local transportation sales tax revenue to attract outside funds for projects already identified in regional and state funding measures. In fiscal year 2017-2018 alone, more than \$77 million of California's Senate Bill 1 (SB-1), the Road Repair and Accountability Act of 2017 transportation funding was earmarked for projects sponsored by CCTA. The required local match for the grant was \$35 million. In other words, for every dollar Contra Costa County taxpayers paid for these projects, the state paid two more dollars.

Similarly, voters approved Regional Measure 3 (RM-3), which was authorized and signed into law in 2018 to fund major roadway and public transit improvements via an increase in tolls on the Bay Area's seven state-owned toll bridges. Contra Costa County projects that may benefit from RM 3 include:

- Interstate 80 Transit Improvements: expand bus service along the Interstate 80 corridor
- Interstate 680 Transit Improvements: enhance transit service along the Interstate 680 corridor, including bus operations, transit centers, and real-time travel information
- East Contra Costa County Transit Intermodal Station: construct a transit intermodal center to enhance access to eBART and the Mokelumne Bike Trail/Pedestrian Overcrossing at Highway 4
- Contra Costa Interstate 680/Highway 4 Interchange Improvements: reduce congestion and improve safety by widening Highway 4 and adding new direct connectors between I-680 and Highway 4
- Richmond-San Rafael Bridge Access (Contra Costa approach): make improvements to reduce delays on bridge approaches and at the toll plaza, including improvements to the Richmond Parkway
- Byron Highway-Vasco Road Airport Connector: improve access, safety, and economic development with a new connector between Byron Highway and Vasco Road

RM 3 provides only partial funding for these projects. Additional funding is needed to make them a reality.

CONTRA COSTA

A ROADMAP FOR THE FUTURE

WHAT THIS TRANSPORTATION EXPENDITURE PLAN WILL ACCOMPLISH

Contra Costa Transportation Authority's (CCTA's) 2020 Transportation Expenditure Plan (TEP) serves as both a roadmap and an itinerary that will guide transportation investments for the coming 30 years. Throughout the 30-year duration of this plan, Contra Costa County's population is expected to grow and change, infrastructure will continue to age and wear out, new forms of travel will emerge, and the environment needs continued protection. Such changes will place even more strain on the county's transportation systems. **Without new investment in transportation, Contra Costa will face a future with distressed and outdated infrastructure, increased traffic on already-congested roadways, and a decrease in critical transportation services to those with the greatest need.**

CCTA strives to preserve and enhance an excellent quality of life for Contra Costa County's residents, businesses, and communities with convenient, reliable, and accessible transportation. We do this through optimizing the existing transportation system, leveraging emerging technologies, offering meaningful programs and services, and providing seamless connections between various forms of transportation (for example, cars, transit, cycling, and walking).

The projects in this plan will benefit all who live and travel within Contra Costa County. The projects will help improve the transportation network over the coming decades to meet growing needs, while supporting economic vitality and an environmentally sustainable future.

Transportation-related technological solutions will continue to evolve to help ease traffic congestion, offer alternative mobility options for travel, provide valuable information to travelers, make it easier and more efficient to maintain our transportation infrastructure, and many other applications that may be currently under development. This TEP reflects CCTA's commitment to fully integrate applicable transportation technologies with traditional infrastructure for the benefit of residents and travelers.

When implemented, the projects in this TEP will accomplish an array of major transportation improvements throughout the county. These projects serve to enhance people's transportation options and reduce congestion on every major transportation corridor in the county. The funding will also reach deep into the local communities to improve residents' quality of life and protect the county's natural environment.

HOW THE TEP WAS CREATED

The 2020 TEP was created for Contra Costa County residents, businesses, and travelers by the communities and people it is intended to serve. Key stakeholder groups were convened and community outreach conducted to understand what outcomes and results are most important to the residents and businesses of Contra Costa County. Through this outreach process, a number of desired outcomes were determined to be of highest priority.

These outcomes served as the basis for high-level funding categories that shape the framework for the TEP. The plan presents a suite of transportation projects and programs that align with guiding principles and will offer a transportation system that supports a vibrant, modern, and livable Contra Costa County.

This TEP is "performance-based," meaning that projects must have defined and measurable outcomes that benefit residents and travelers. Every project with a total project cost more than \$10 million in funding must undergo a performance analysis and review prior to funding being allocated. In this way, county taxpayers can be assured that the funding is well spent to meet the county's transportation goals.

TAXPAYER SAFEGUARDS

Over the past 30 years, CCTA has operated under a system of rigorous taxpayer safeguards to protect the county's investments and to ensure that transportation sales tax revenue is invested wisely, equitably, and transparently. CCTA consistently achieves the highest standards in its governmental accounting and financial reporting and ensures full accountability in its programs and projects.

With the 2020 TEP, CCTA is fully committed to continuing our strong accountability to Contra Costa taxpayers through many safeguards. For example:

- CCTA will continue to publish an annual budget and strategic plan that estimates expected transportation sales tax receipts, other anticipated revenue, and planned expenditures for the year.
- CCTA's public oversight committee will continue to provide diligent oversight of all CCTA expenditures and report its oversight activities and findings to the public through annual audits that focus on the allocation of funding, project performance, local jurisdiction compliance, and growth management performance.
- CCTA will routinely inform, communicate with, and engage its partner organizations, advisory committees, and the county's residents and businesses to ensure that its programs and projects are fully transparent and best meet the needs of its residents.
- CCTA will strive to balance the needs of all people and areas of Contra Costa County to support an equitable and sustainable transportation system for all.
- CCTA's regional transportation planning committees will continue to ensure cohesion with local and subregion planning and implementation efforts and adherence to adopted policies.

PERTINENT POLICIES

CCTA implements and follows several key policies to ensure that Contra Costa's transportation systems are in alignment with the county's established future vision. Full text of these policies is included in the Policy Statements section at the end of this document. In summary, these key policies are as follows:

Growth Management Program: establishes principles that preserve and enhance the county's quality of life and promote a healthy and strong economy through a cooperative, multi-jurisdictional process for managing growth while maintaining local authority over land use decisions.

Urban Limit Line Compliance Policy: requires each jurisdiction to adopt and comply with a voter-approved Urban Limit Line, which defines the physical limits of a jurisdiction's future urban development.

The Growth Management Program and Urban Line Limit Compliance policies in place since Measure J began in 2009 have been enhanced in this TEP.

CCTA, with input from many stakeholders, has developed the following additional four policies to ensure that projects align with the vision, guidelines, and requirements for fund expenditures.

Transit Policy: sets out goals for improving, coordinating, and modernizing transit service—along with first- and last-mile connections to transit—thereby increasing the percentage of residents and commuters that may travel conveniently by public transit.

Complete Streets Policy: encourages making local streets more efficient and safe for all users—including

drivers, pedestrians, bicyclists, and transit riders—and giving travelers convenient options while minimizing the need to widen roadways.

Advanced Mitigation Program: provides innovative ways to advance needed infrastructure projects more efficiently and provides more effective conservation of natural resources, watersheds and wetlands, and agricultural lands.

Vision Zero: requires all funding recipients to systemically apply planning and design practices that quantifiably reduce the risk of traffic-related deaths and severe injuries.

GUIDING PRINCIPLES USED TO DEVELOP THE TEP

CCTA is fully committed to planning, funding, and delivering transportation solutions that meet the transportation needs of Contra Costa County's residents, businesses, and travelers, through a strong set of guiding principles including:

DEFINED BENEFITS

CCTA will use transportation sales tax revenue to achieve defined outcomes and benefits.

PUBLIC PARTICIPATION

CCTA will conduct a public outreach program that collects input from stakeholders, residents, and communities throughout Contra Costa County and responds accordingly with meaningful action.

ACCOUNTABILITY AND TRANSPARENCY

CCTA strives for excellence in protecting the public's investments. We aim to routinely engage with partner organizations, advisory committees, and the county's residents and businesses to ensure full transparency.

BALANCED AND EQUITABLE APPROACH

CCTA will balance the needs and benefits for all people and all areas of Contra Costa County to provide an equitable and sustainable transportation system.

MAXIMIZE AVAILABLE FUNDING

CCTA will proactively seek regional, state, and federal funding and private investments to supplement the county's local transportation sales tax revenue, thereby maximizing the total amount of funding for transportation projects in Contra Costa County.

COMMITMENT TO TECHNOLOGY AND INNOVATION

CCTA is committed to keeping Contra Costa County on the cutting edge of transportation technology by continuing to incorporate advanced technologies and emerging innovations into the transportation system.

COMMITMENT TO GROWTH MANAGEMENT

CCTA administers countywide policies that support thoughtful growth management to sustain Contra Costa's economy, preserve its environment, and support its communities.

CONTRA COSTA
transportation
authority

BIKE ROUTE

PROPOSED TRANSPORTATION INVESTMENTS

PLANNING FOR THE FUTURE

This Transportation Expenditure Plan (TEP) includes transportation-related projects and programs to be planned, designed, funded, constructed, and/or delivered in Contra Costa County over the next thirty years. This plan anticipates an investment of approximately \$3 billion of revenue generated from the half-cent transportation sales tax. Contra Costa County's local sales tax revenue will help Contra Costa Transportation Authority (CCTA) attract additional local, regional, state, and federal funding to augment the sales tax revenue.

The project descriptions that follow are purposefully brief and offer general overviews of the purpose and nature of the projects. Several projects (such as affordable transit for students, seniors, and people with disabilities) are continuations or enhancements to ongoing work performed under Measure J. Many other projects included in this plan are still in the concept or planning stages. Stakeholders and the public will have plenty of future opportunities to help shape these projects so that they are most useful and beneficial to residents, commuters, and visitors.

In its role as the administrator of Contra Costa County's transportation sales tax revenue, CCTA has instituted requirements so that taxpayer's revenue is invested per established policies, as presented in the Policy Statements section of this TEP. The policy statements generally require that recipients of funding perform advance performance assessments and comply with applicable laws and other CCTA policies. The Taxpayer Safeguards and Accountability Policy in the Policy Statements section includes the full statement of funding requirements and restrictions, as applicable.

CCTA sets aside funding to implement the countywide Growth Management Program, prepare the countywide transportation plan, and support the programming and monitoring of federal and state funds, as well as CCTA's Congestion Management Agency functions. A very small percentage of the funding also covers basic administrative functions (such as salaries) and basic expenses (such as rent).

▶ \$1.41 BILLION

IN 2017, THREE MAJOR
FREEWAYS IN CONTRA
COSTA COUNTY RANK IN THE
TOP 10 WORST COMMUTES:
I-680, HIGHWAY 24 AND
HIGHWAY 4.*

RELIEVING CONGESTION ON HIGHWAYS, INTERCHANGES, AND MAJOR ROADS

More than 79 percent of Contra Costa County's residents drive to work; several of Contra Costa County's highways have the been identified as the "most congested in the San Francisco Bay Area."**

Easing traffic congestion is one of Contra Costa County residents' highest priorities. Accordingly, CCTA will invest nearly half of the new transportation sales tax revenue toward new, modern tools and strategies to improve traffic flow and reduce traffic congestion on the county's major corridors and roads. These strategies include highway and road improvements thoughtfully integrated with transit improvements and alternative modes.

Improving transit and transit connections will lessen traffic congestion on the county's highways; as transit service is improved and more people take transit, fewer cars on the road translates to less traffic.

CCTA is committed to improving access to jobs and the development of the Northern Waterfront and throughout Contra Costa. Transportation programs and projects will promote affordable housing and housing within planned or established job centers that are supported by transit, or that support economic development and job creation. CCTA's strategies will also incentivize employers to create local jobs, and promote transit, shared trips, telecommuting, and shifting work schedules, all with the intent of reducing commuter traffic at peak commute times.

Projects will be subject to applicable policies as presented in the Policy Statements section at the end of this document.

**SOURCE: Metropolitan Transportation Commission, Vital Signs, 2016-2017 data

WHAT'S A CORRIDOR?

A corridor is a swath or belt of land that contains one or more types of transportation infrastructure, such as a road or railway. Each of Contra Costa County's corridors contains a major interstate or highway as well as a major transit line; roads, streets, paths, bus lines, and transit stations.

Everyone is impacted by the performance of corridors, and this impact is felt each and every day, whether you're doing your daily commute, heading to a medical appointment, or traveling to a youth soccer game. CCTA is focused on optimizing all transportation within a corridor so that traffic is smooth, transit is convenient, and all systems work together to support travel across communities and throughout the region. For purposes of this Transportation Expenditure Plan, CCTA is focused on three major transportation corridor improvement categories:

- » Improve State Route 242, Highway 4, and eBART Corridor
- » Modernize I-680, Highway 4, and BART Corridor
- » Enhance I-80, I-580 (Richmond-San Rafael Bridge), and BART Corridor

» Improve SR-242, Highway 4, and eBART Corridor

4 242

RELIEVE CONGESTION AND IMPROVE ACCESS TO JOBS ALONG HIGHWAY 4 AND SR-242

CCTA is continuing its work in **easing traffic congestion**, smoothing traffic flow, and reducing travel time along Highway 4 and SR-242 with a blend of projects that may be considered such as:

- Improve access to jobs and development along the Northern Waterfront
- Improving access to local key destinations, including business districts and BART stations
- Reconfiguring interchanges along SR-242
- Managing traffic flow on Highway 4 by connecting and **synchronizing traffic on freeway**, local roads and freeway ramps.
- Completing operational improvements at the I-680/ Highway 4 interchange
- Addressing bottlenecks and cooling hot spots caused by high-volume weaving areas and **adding auxiliary lanes** and improving ramps between SR-242 and Bailey Road
- Providing incentives to encourage the use of transit and alternative transportation options.

5th most
CONGESTED
HIGHWAY
in the Bay Area
*Eastbound Martinez to Pittsburg**

IMPROVE LOCAL ACCESS TO HIGHWAY 4 AND BYRON AIRPORT

CCTA has developed a multi-pronged approach to **reducing traffic congestion and improving safety and travel time reliability** on the roads through and around Byron. These projects will also facilitate economic development and goods movement in east Contra Costa County. Key projects may consider:

- A new limited-access connector between Byron Highway and Vasco Road south of Camino Diablo to **improve access to Byron Airport**, making it a more useful transportation hub
- Improvements to Vasco Road and Byron Highway, and other safety improvements
- Interchange improvements along Highway 4 at Balfour Road, Marsh Creek Road, Walnut Boulevard; and Camino Diablo
- Enhancements to the Byron Airport
- Improve access to jobs and development along the Northern Waterfront

These projects will include measures to prevent growth outside pre-defined urban limit lines, for example, prohibitions on roadway access from adjacent properties, permanent protection and/or acquisition of agricultural lands or critical habitat, and habitat conservation measures.

ADDITIONAL eBART TRAIN CARS

Trains are full with standing room only during commute hours. Funding will be considered for allocation toward **purchasing additional eBART train cars** so that trains can run more frequently, thereby carrying more passengers on this popular route.

*Source: Metropolitan Transportation Commission, "Vital Signs: Bay Area Freeway Locations with most Weekday Traffic Congestion, 2017" - https://mtc.ca.gov/sites/default/files/top_10_congestion_locations-2017.pdf

SEAMLESS CONNECTED TRANSPORTATION OPTIONS

Contra Costa County's transportation system is a mix of freeways to bike paths, trains to shuttles, and many other modes in between. Providing **seamless connectivity among these many travel options** will ensure that our system can meet the future needs of our growing and aging population.

CCTA will develop guidelines and implement systems to promote connectivity between all users of the transportation network (vehicles, pedestrians, bicycles, buses, trucks, etc.) using automation technology and taking advantage of future transportation technology trends.

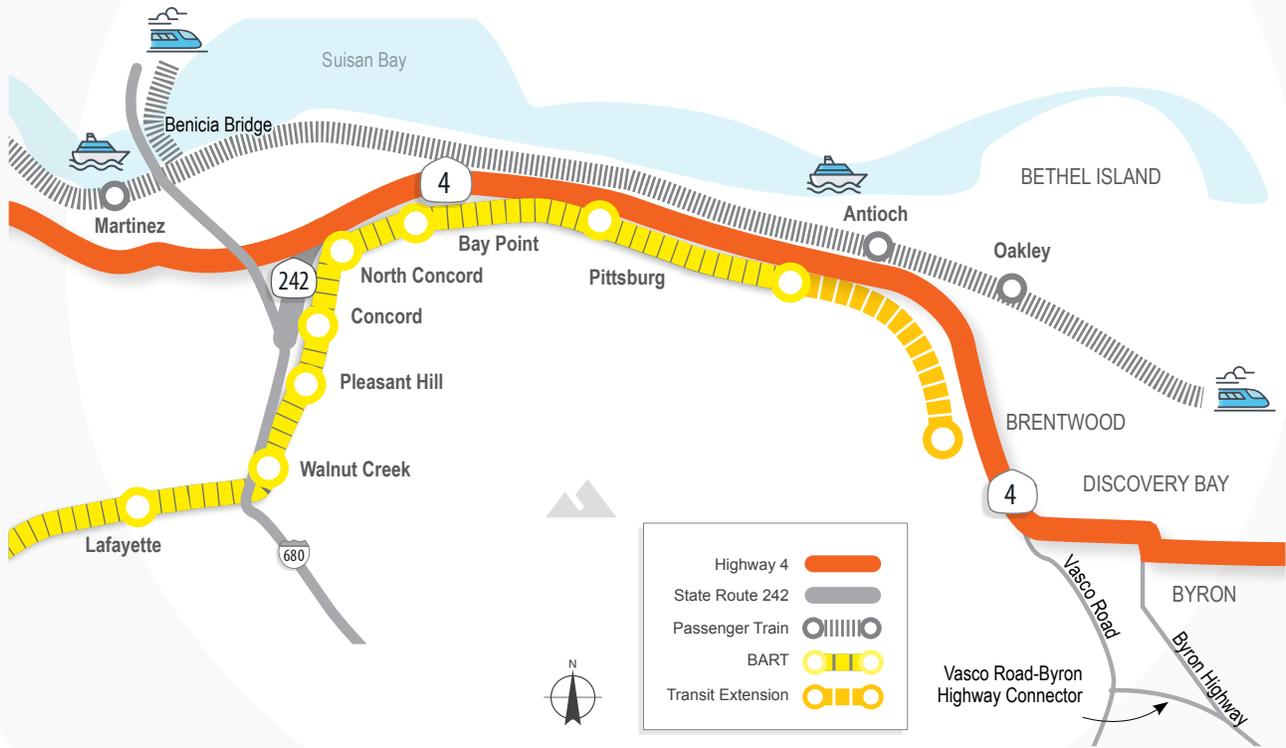

ENHANCE FERRY SERVICE AND COMMUTER RAIL IN EAST AND CENTRAL COUNTY

To help travelers make convenient connections between the Capitol Corridor and San Joaquin train system and the BART system, CCTA proposes to **fund new stations and improvements to existing stations** and rail facilities. Some example projects may include a new train station for the San Joaquin line and a park-and-ride lot in Oakley; new connections between the new Oakley station and Antioch eBART; and a transit connection from the Martinez Amtrak station to the North Concord/ Martinez BART station.

CCTA is also considering expanding ferry service between Martinez and Antioch. As more people use ferries and the passenger train, traffic congestion on Contra Costa County's roads and highways will decrease, **traffic will flow more smoothly, and air emissions will decrease**, thereby improving the county's air quality.

» TOTAL INVESTMENTS: \$689 million

IMPROVE TRAFFIC FLOW ON MAJOR ROADS IN EAST COUNTY

CCTA is committed to relieving congestion on major roads and **implementing modern systems** that provide safe, efficient, and reliable movement of buses, vehicles, bicyclists, and pedestrians. Projects will range in size and type, and may consider, for example:

- New and/or wider lanes or shoulders
- **New bicycle and pedestrian facilities**
- Installation of “smart” parking management programs
- **Traffic signal synchronization** and other innovative technologies
- Traffic calming measures and roundabouts
- Shoulders, sidewalks, curbs and gutters, and streetscapes
- Bus transit facility enhancements such as bus turnouts and passenger amenities
- Close gaps and extend major roads to relieve congestion and improve safety

EAST COUNTY TRANSIT EXTENSION TO BRENTWOOD AND CONNECTIVITY TO TRANSIT, RAIL, AND PARKING

Expanding transit service throughout east Contra Costa County will enable more people to travel conveniently to the Antioch eBART station and other destinations served by transit. The TEP may consider funding a direct link between a new intermodal center in Brentwood to the Antioch eBART station.

Funding will also be considered to **improve transit service throughout Brentwood, Oakley and nearby communities** via new shuttle service, bus service, and transit hubs such as a new Tri Delta park-and-ride lot to service eBART and a new Amtrak San Joaquin station in Oakley. Funding will help integrate existing transit services using new technologies, so that people have smooth and convenient connections with less wait time.

IMPROVE TRANSIT RELIABILITY ALONG SR-242, HIGHWAY 4, AND VASCO ROAD

One of CCTA’s strategies to smoothing traffic along SR-242, Highway 4, and Vasco Road is to **improve and enhance transit service** to give travelers viable and convenient options to driving. When more people take transit, there will be fewer cars on the road and traffic congestion will be reduced. Possible projects may consider:

- Increased express bus service
- Improved interchanges and local access for buses so they can access the highways more efficiently
- **Dedicated part-time transit lanes** to bypass congestion
- Improved transit connections between transit stations (including BART stations and ferry terminals), schools, housing, and employment centers, thereby addressing transit users’ first-mile/last-mile challenges

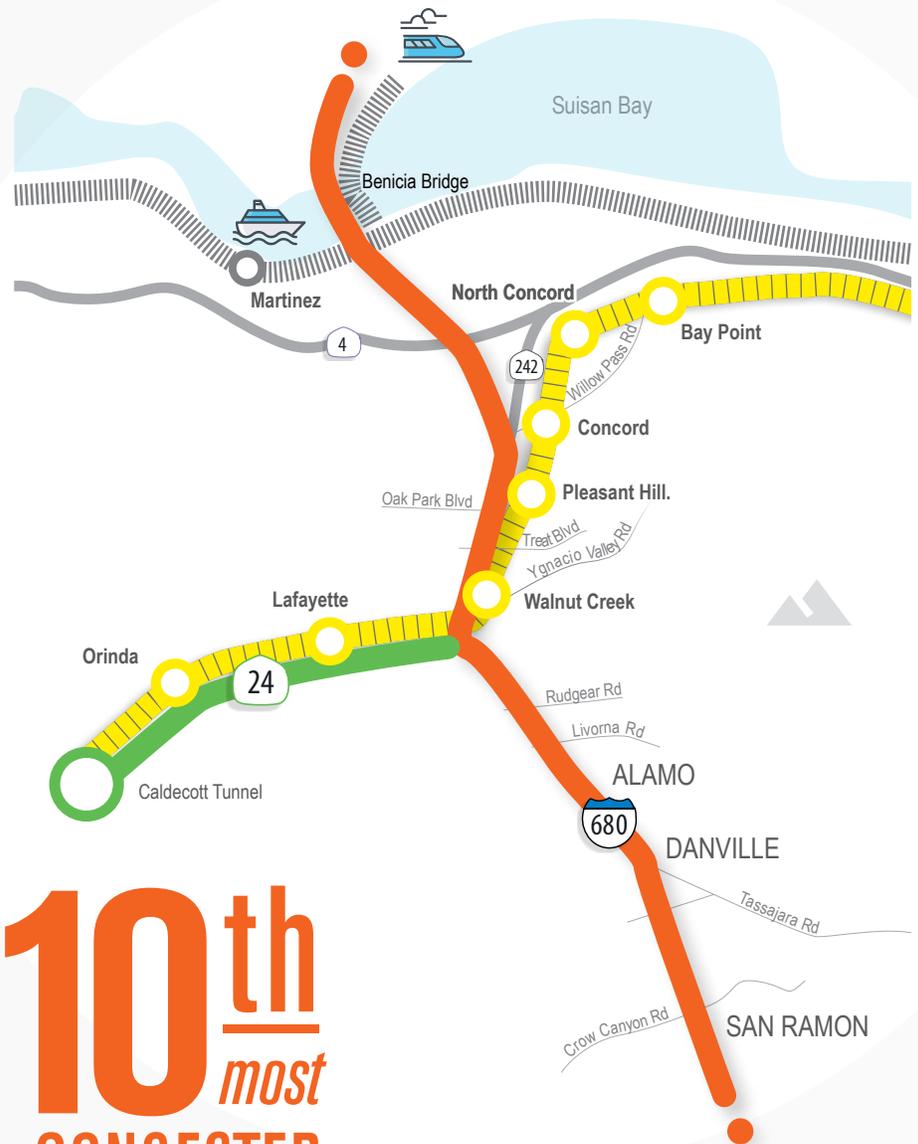

» Modernize I-680, Highway 24, and BART Corridor

RELIEVE CONGESTION, EASE BOTTLENECKS, AND IMPROVE LOCAL ACCESS ALONG THE I-680 CORRIDOR

Improvements to the I-680 corridor will work together to address bottlenecks, **relieve traffic congestion**, smooth traffic flow, reduce travel times, **improve air quality**, and offer efficient transportation choices to all travelers. Key strategies to be considered include:

- **Complete express lanes** in both directions from Rudgear Road in Walnut Creek to the Benicia Bridge to provide 25 miles of continuous southbound express lanes and nearly continuous northbound express lanes
- Address congestion hot spots caused by high-volume weaving areas between Livorna Road and Treat Blvd. Additional merge lanes and ramp improvements at these locations **will provide safe merging for motorists and ease bottlenecks** that currently create chronic delays
- Implement innovative technology solutions to manage traffic flow by connecting and synchronizing traffic on local arterials, freeway ramps, and freeways
- **Expand park-and-ride facilities** to enable people to use transit more often
- Implement transportation demand management programs to reduce single-occupancy vehicle travel
- Provide incentives for using alternative transportation options

10th most CONGESTED HIGHWAY in the Bay Area Northbound Danville to Walnut Creek*

I-680	
Highway 24	
Passenger Train	
BART	

*Source: Metropolitan Transportation Commission, "Vital Signs: Bay Area Freeway Locations with most Weekday Traffic Congestion, 2017" - https://mtc.ca.gov/sites/default/files/top_10_congestion_locations-2017.pdf

» TOTAL INVESTMENTS: \$493 million

IMPROVE TRAFFIC FLOW ON MAJOR ROADS IN CENTRAL COUNTY AND LAMORINDA

CCTA is committed to relieving congestion on major roads and implementing modern systems that provide **safe, efficient, and reliable movement of buses, vehicles, bicyclists, and pedestrians**. Projects will range in size and type, and may consider, for example:

- New and/or wider lanes or shoulders
- New bicycle and pedestrian facilities
- Installation of “smart” parking management programs
- Traffic signal synchronization and other innovative technologies
- Traffic calming measures and roundabouts
- Shoulders, sidewalks, curbs, gutters, and streetscapes
- Bus transit facility enhancements such as bus turnouts and passenger amenities

IMPROVE TRAFFIC FLOW ON HIGHWAY 24 AND MODERNIZE THE OLD BORES OF CALDECOTT TUNNEL

CCTA has plans to improve traffic flow and access along Highway 24 in Orinda, Lafayette, and Moraga through a suite of projects that could include improving interchanges, modifying major roads to reduce highway access delays, and other congestion-reducing improvements. CCTA will also **develop transit and shared trip incentives** for drivers in lieu of single-occupant vehicle travel.

The original two-bore Caldecott Tunnel opened in 1937. CCTA will implement improvements that could include increase lighting and visibility, improved traffic alerts for crashes or stalled vehicles, and other physical or technological solutions to improve safety, and help improve traffic flow in the tunnels.

IMPROVE TRANSIT RELIABILITY ALONG THE I-680 AND HIGHWAY 24 CORRIDORS

One of CCTA’s strategies to smoothing traffic along the I-680 and Highway 24 corridors is to improve and **enhance transit service** to give travelers viable and convenient alternatives to driving in their vehicles. When more people take transit, there will be fewer cars on the road and traffic will be reduced. Funding may consider the following:

- Implement and increase express bus service along the I-680 and Highway 24 corridors
- Improve interchanges and local access so buses can access the highways more efficiently
- Provide **dedicated part-time transit lanes** along I-680 to bypass congestion
- **Improve transit connections** between transit stations, schools, housing, and employment centers, thereby addressing first-mile/last-mile challenges for transit users

PROVIDE GREATER ACCESS TO BART STATIONS ALONG I-680 AND HIGHWAY 24

In addition to making shuttle service to and from BART more frequent, CCTA will consider allocating funding toward making **parking and access improvements** that serve BART stations, so that buses and people in vehicles—along with people arriving by walking or bicycling—can get to the station more easily and conveniently. Funding may be considered for constructing satellite parking lots with frequent direct shuttle service to BART.

SEAMLESS CONNECTED TRANSPORTATION OPTIONS

Contra Costa County’s transportation system is a mix of freeways to bike paths, trains to shuttles, and many other modes in between. **Providing seamless connectivity** among these many travel options will ensure that our system can meet the future needs of our growing and aging population.

CCTA will develop guidelines and implement systems to promote connectivity between all users of the transportation network (vehicles, pedestrians, bicycles, buses, trucks, etc.) using automation technology and **taking advantage of future transportation technology trends**.

IMPROVE TRAFFIC FLOW ON MAJOR ROADS IN SAN RAMON VALLEY

CCTA is committed to relieving congestion on major roads and implementing modern systems that provide **safe, efficient, and reliable movement of buses, vehicles, bicyclists, and pedestrians**. Projects will range in size and type, and may consider, for example:

- New and/or wider lanes or shoulders
- New bicycle and pedestrian facilities
- Installation of “smart” parking management programs
- Traffic signal synchronization and other innovative technologies
- Traffic calming measures and roundabouts
- Shoulders, sidewalks, curbs, gutters, and streetscapes
- Bus transit facility enhancements such as bus turnouts and passenger amenities

» Enhance I-80, I-580, and BART Corridor

RELIEVE CONGESTION AND IMPROVE LOCAL ACCESS ALONG THE I-80 CORRIDOR

Improvements to the I-80 corridor will address bottlenecks, relieve traffic congestion, smooth traffic flow, reduce travel times, improve air quality, and offer efficient transportation choices to all travelers. Key improvements may include:

- Several innovative strategies and operational improvements will be implemented to **reduce travel time, improve air quality, reduce weaving at interchanges**, and smooth traffic flow
- Expand intelligent transportation systems and advanced technology strategies along I-80 to **maximize system efficiency** and prepare the corridor for future advances in transportation technology
- Increase travel time reliability in the carpool lanes through cost-effective **managed lane strategies** and enforcement
- Improve and expand express transit service through the corridor
- Transform park-and-ride facilities into **shared mobility hubs** that provide multi-modal transportation options and amenities to encourage transit use
- Provide incentives to encourage the use of transit and alternative transportation options.

\$187M

WILL BE SPENT TO INCREASE BUS SERVICES AND RELIABILITY IN WEST CONTRA COSTA COUNTY.

» TOTAL INVESTMENTS: \$226 million

IMPROVE TRAFFIC FLOW ON MAJOR ROADS IN WEST COUNTY

CCTA is committed to relieving congestion on major roads and implementing modern systems that provide safe, efficient, and reliable movement of buses, vehicles, bicyclists, and pedestrians. Projects will range in size and type, and may consider, for example:

- Railroad grade separations
- New and/or wider lanes or shoulders
- **New bicycle and pedestrian facilities**
- Installation of “smart” parking management programs
- **Traffic signal synchronization** and other innovative technologies
- Traffic calming measures and roundabouts
- Shoulders, sidewalks, curbs and gutters, and streetscapes
- Bus **transit facility enhancements** such as bus turnouts and passenger amenities

ENHANCE FERRY SERVICE AND COMMUTER RAIL IN WEST COUNTY

To help travelers make convenient connections with the Capitol Corridor and San Joaquin train systems, CCTA will consider funding a **new regional intermodal station** in Hercules, along with new or improved ferry services in Hercules with connections to the train. As more people use ferries and the train, traffic congestion on Contra Costa County's roads and highways will be less, traffic will flow more smoothly, and air emissions will decrease thereby improving the county's air quality.

SEAMLESS CONNECTED TRANSPORTATION OPTIONS

Contra Costa County's transportation system is a mix of freeways to bike paths, trains to shuttles, and many other modes in between. **Providing seamless connectivity** among these many travel options will ensure that our system can meet the future needs of our growing and aging population.

CCTA will develop guidelines and implement systems to promote connectivity between all users of the transportation network (vehicles, pedestrians, bicycles, buses, trucks, etc.) using automation technology and **taking advantage of future transportation technology trends.**

IMPROVED TRAFFIC FLOW AND LOCAL ACCESS TO RICHMOND-SAN RAFAEL BRIDGE ALONG I-580 AND RICHMOND PARKWAY

CCTA plans to relieve traffic congestion and reduce traffic delays by **modernizing facilities**, expanding pedestrian and bicycling options, improving transit reliability, and encouraging the use of carpools and buses.

Specific improvements to be considered:

- **Extending the carpool lane along I-580** from the toll plaza to Central Avenue in El Cerrito
- Making improvements so that pedestrians and cyclists can better access the Richmond-San Rafael bridge, Richmond Parkway, Richmond Ferry Terminal, and Richmond BART Station
- Improving interchange at Richmond Parkway and I-580
- **Providing incentives** for using alternative transportation options

IMPROVE TRANSIT RELIABILITY ALONG THE I-80 CORRIDOR

One of CCTA's strategies to smoothing traffic along the I-80 corridor is to improve and **enhance transit service** to give travelers viable and convenient options to driving. When more people take transit, there will be fewer cars on the road and traffic will be reduced. Funding is planned to:

- Increase express bus service along the corridor
- Improving interchanges and local access for buses so they can access the highways more efficiently
- Provide dedicated part-time transit lanes along I-80 to bypass congestion
- **Improve transit connections** between transit stations (including BART stations and ferry terminals), schools, housing, and employment centers, thereby addressing first-mile/last-mile challenges for transit users
- Provide incentives to travelers to use alternative transportation options

Several of these projects are earmarked for RM-3 funding, with CCTA providing matching funds.

▶ **\$1.53 BILLION**

IMPROVING TRANSPORTATION COUNTYWIDE IN ALL OUR COMMUNITIES

The quality of roads and availability of transportation options are two major factors in making our communities great places to live, as are the availability of jobs, safety, access to parks and trails, and good clean air and water. CCTA will implement many projects throughout the county to improve our local communities and **protect Contra Costa County's environment and quality of life.**

The previous section of this TEP presented investments focused on Contra Costa County's major corridors. This section describes funding that spreads into every community, through local projects and programs that improve the county's vast transportation network.

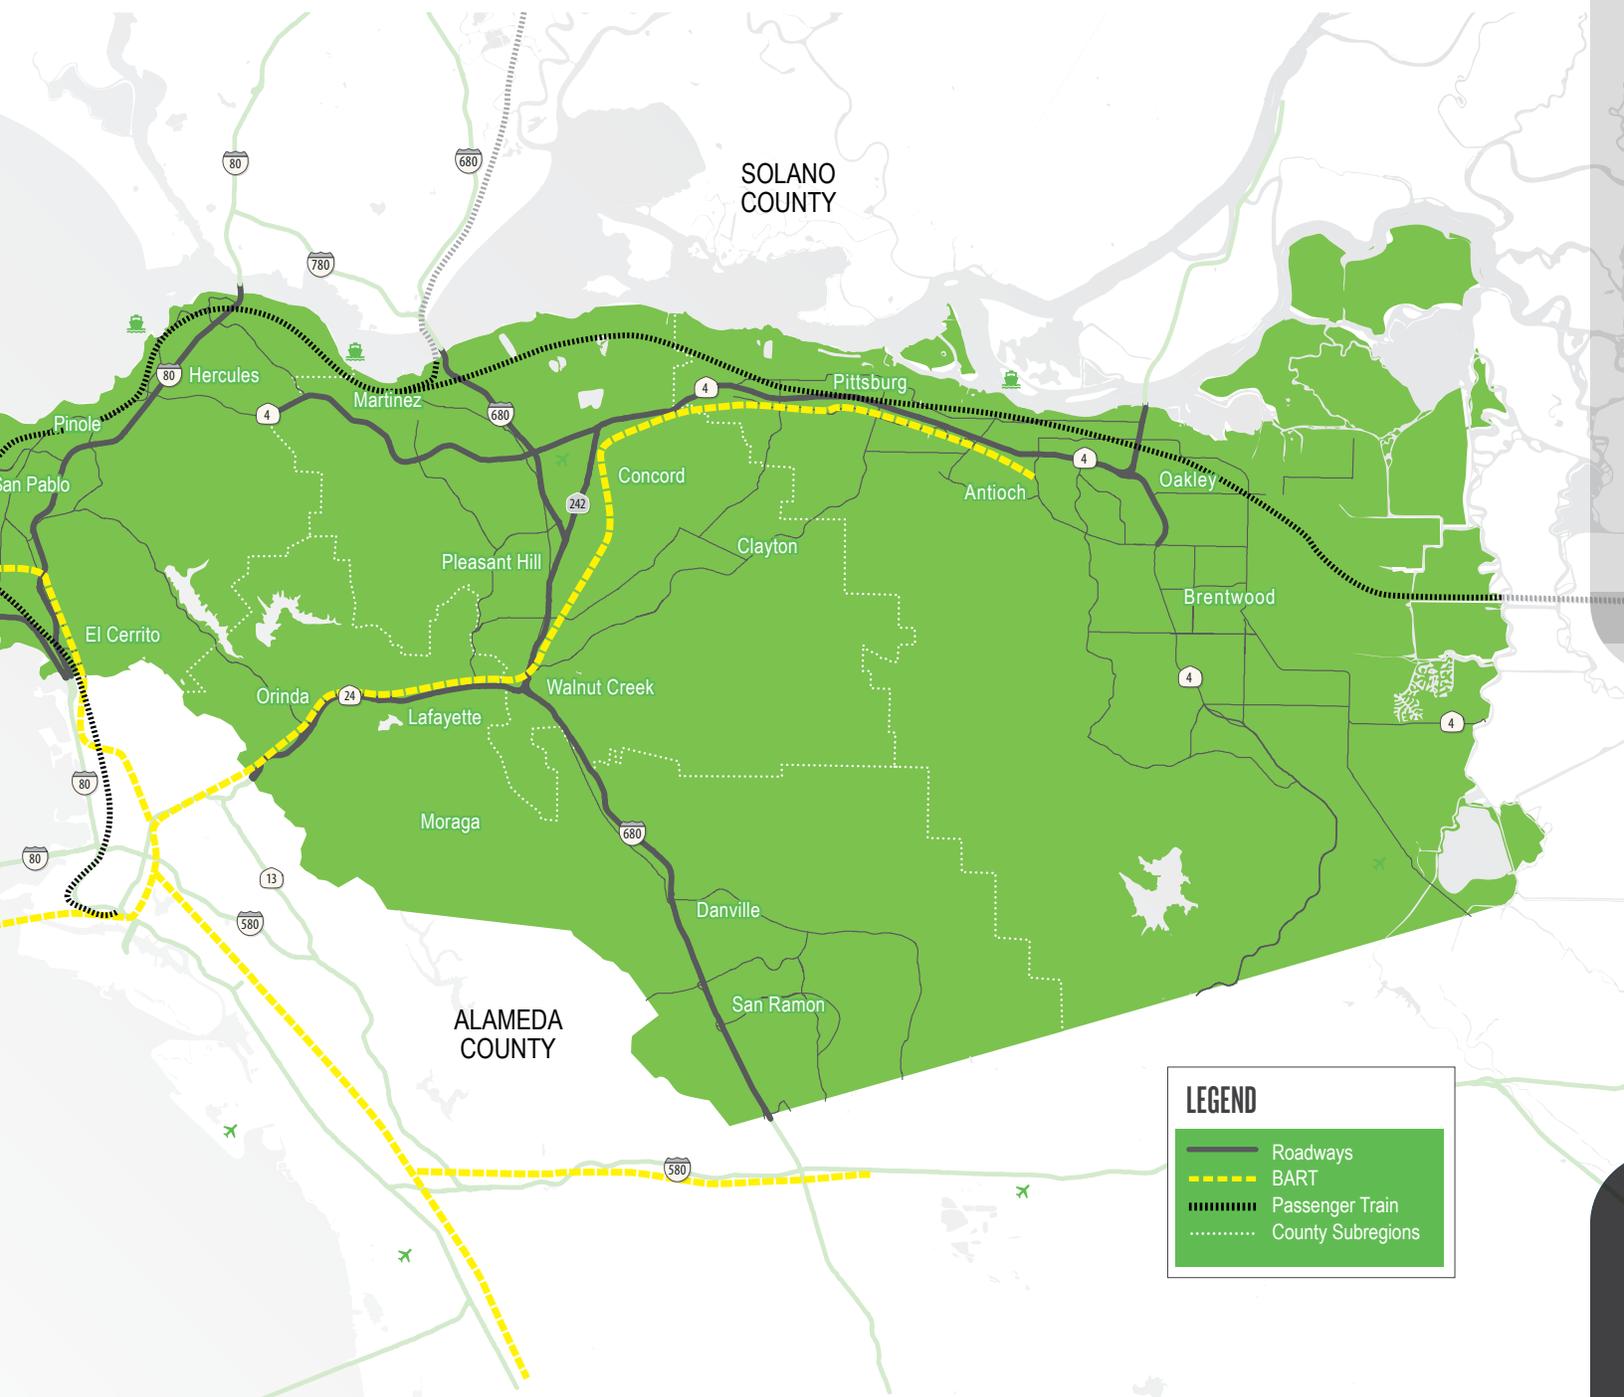

Funding will be allocated toward improving local roads and streets to make them safer for all travelers. Smaller projects—such as removing bottlenecks, improving traffic signal operations, installing traffic calming measures, and making streetscape improvements—can make big improvements in a community's quality of life.

Funding will be allocated toward substantial investments in a **robust transit system** that provides affordable, efficient, convenient, and accessible transit to travelers throughout the county. These projects will result in cleaner, safer, and more reliable trips on BART, buses, and ferries. The transit systems will extend into parts of the county that are currently lacking frequent transit service. When more people take transit, traffic congestion on the county's roads and highways will decrease, traffic will flow more smoothly, and **air emissions will decrease**, thereby improving the county's air quality.

CCTA is committed to supporting affordable and safe transportation for all Contra Costa County residents. CCTA will allocate funding toward a wide array of **programs for students, seniors, veterans, and people with disabilities**, aimed at offering safe transportation options and improving mobility.

Projects will be subject to applicable policies as presented in the Policy Statement section.

» Improving Transportation Countywide In All Our Communities

FIX AND MODERNIZE LOCAL ROADS

Smooth, pothole-free roads, safe intersections, pleasant sidewalks, safe bike lanes, and clean air are some of the important features that make Contra Costa County a great place to live and work.

CCTA will provide funding directly to the county's cities, towns, and unincorporated areas so that they may make improvements to their own local roads and streets. Each jurisdiction in Contra Costa County will receive a base allocation of \$100,000 per year plus additional funds distributed based half on relative population and half on road miles within each jurisdiction.

To ensure transparency and accountability, local agencies report annually on the amount spent on roadway maintenance, bicycle and pedestrian facilities, transit facilities, and other roadway improvements. Local agencies must also meet the requirements set forth in the Growth Management Program, Urban Limit Line Compliance Requirements, Transit Policy, Complete Streets Policy, and other applicable policies in the Policy Statements section.

SAFE TRANSPORTATION FOR YOUTH AND STUDENTS

Drop-off and pick-up at schools often creates traffic jams on local streets and unsafe conditions for children. CCTA will allocate funding toward a wide array of transportation projects and programs for students, and youth, aimed at offering safe transportation options, such as walking, and cycling, and improving mobility.

Funding will also be used for **reduced fare transit passes**, transit incentives, and school bus programs to encourage more youth and students to use transit to attend school and afterschool programs. This will also relieve traffic congestion.

In cooperation with project sponsors in each subregion, CCTA will establish guidelines to define priorities and maximize effectiveness. The guidelines may require provisions such as operational efficiencies, performance criteria, parent contributions, and reporting requirements.

IMPROVE WALKING AND BIKING ON STREETS AND TRAILS

Numerous studies and research across many different communities have demonstrated the benefits of creating an environment where walking and bicycling are safe, comfortable, and convenient. For example, **increased walking and bicycling can improve air quality by reducing emissions and energy use** from motor vehicles; improving access by foot or bike can make transit more convenient; and regular walking and bicycling can improve people's health and reduce mortality rates and health care costs.

This TEP contains **unprecedented levels of funding to improve safety for bicyclists and pedestrians in every part of the county**— from local street improvements to trail enhancements and similar projects. Funding will be considered to implement projects in the Contra Costa Countywide Bicycle and Pedestrian Plan, most recently updated in 2018. CCTA will develop program guidelines for a competitive project selection process that maximizes benefits for all users. All funding will be consistent with CCTA's Complete Streets, Vision Zero, and other applicable policies.

Approximately one-fifth of the funds will be considered for allocation to the East Bay Regional Park District for the development, maintenance, and rehabilitation of paved regional trails.

» TOTAL INVESTMENTS: \$1.53 billion

AFFORDABLE TRANSPORTATION FOR SENIORS, VETERANS, AND PEOPLE WITH DISABILITIES

Contra Costa County's population is aging. As people get older or become disabled and can no longer drive, they will increasingly rely on other ways to get around. Funding in this category will be used for **affordable and safe countywide transportation** for seniors, disabled veterans, and other people with disabilities who, due to age or disability, cannot drive or take other transit options.

In collaboration with stakeholders and service providers, CCTA will develop an Accessible Transportation Services Strategic Plan to guide the use of these funds.

CLEANER, SAFER BART

BART began operating in the early 1970s and its stations and station equipment are showing their age. There are eleven BART stations located in Contra Costa County.

CCTA plans to fund a suite of modernization projects at select stations to **increase safety, security, and cleanliness**, and to improve customer experience. Several projects will focus on improving reliability of fare gates and reducing fare evasion. Many of these projects are eligible for Measure RR (BART's \$3.5 billion general obligation bond). CCTA will provide no more than a dollar-for-dollar match for BART projects. BART and CCTA will develop a countywide program to determine how funding is allocated, evaluated, and tracked for effectiveness. Specific funding and maintenance of effort requirements are required and identified in the Taxpayers Safeguards and Accountability Policy.

PROVIDE CONVENIENT AND RELIABLE TRANSIT SERVICES IN CENTRAL, EAST, AND SOUTHWEST COUNTY

Although BART and rail service offers backbone transit options to residents in central, southwest, and east County, many neighborhoods and communities are unserved or underserved by bus or other transit options, meaning that transit is not close enough to people who want to use it, and not frequent enough to be convenient. Funding will be provided to public transit operators in the central, east, and southwest subregions to provide **cleaner, safer, and more reliable trips on buses or shuttles**. This funding will enable transit operators to improve the frequency of service on existing routes, especially high-demand routes, increase ridership, and incentivize transit use by offsetting fares.

INCREASE BUS SERVICES AND RELIABILITY IN WEST CONTRA COSTA COUNTY

Many people in west Contra Costa County rely on buses and transit as their primary means of travel. CCTA will focus on expanding transit services to unserved or underserved areas, along with more frequent and reliable bus service to all. Funding will be provided to public transit operators in the west subregion of Contra Costa County (including AC Transit and WestCAT) to **provide cleaner, safer, and more reliable trips on buses**. This funding will enable transit operators to improve the frequency of service on existing routes, especially high demand routes, increase, and incentivize transit use by offsetting fares.

REDUCE EMISSIONS AND IMPROVE AIR QUALITY

CCTA is a nationwide leader in sustainable, technology-enabled transportation and integrates innovative technological solutions into Contra Costa County's transportation network to improve traffic flow and safety, reduce greenhouse gas emissions, and offer improved travel options. Technology solutions can help solve the challenges of the lack of connectivity between transportation options, resulting in reduced emissions, and improved air quality. Eligible expenditures in this category include:

- Implementing the strategies developed in the 2019 Contra Costa Electric Vehicle Readiness Blueprint and subsequent updates
- Reducing transportation-related greenhouse gases through the utilization of a cleaner vehicle fleet including alternative fuels and/or locally produced energy
- Preparing for a growing fleet of zero-emission vehicles by facilitating the installation of electric charging stations or alternative fuels
- Increasing utilization of non-auto types of transportation by expanding walking and biking paths and transit options
- Using demand management strategies designed to reduce congestion, increase use of non-auto transportation, increase occupancy of autos, manage existing infrastructure, and reduce greenhouse gas emissions
- Managing parking supply to improve availability, utilization, and to reduce congestion and greenhouse gas production

Funding is intended to match regional, state, or federal grants and private-sector investment to achieve maximum benefits. CCTA will develop and adopt guidelines for a competitive project selection process for the use of these funds.

POLICY STATEMENTS

The Growth Management Program (GMP)

GOALS AND OBJECTIVES

The overall goal of the GMP is to preserve and enhance the quality of life and promote a healthy, strong economy to benefit the people and areas of Contra Costa through a cooperative, multi-jurisdictional process for managing growth, while maintaining local authority over land-use decisions.¹

The objectives of the GMP are to:

- Assure that new residential, business, and commercial growth pays for the facilities required to meet the demands resulting from that growth;
- Require cooperative transportation and land-use planning among Contra Costa County, cities/towns, and transportation agencies;
- Support land-use patterns within Contra Costa that make more efficient use of the transportation system, consistent with the General Plans of local jurisdictions; and
- Support infill and redevelopment in existing urban and brownfield areas.

The Measure J Transportation Expenditure Plan GMP, which includes Principles of Agreement for Establishing the Urban Limit Line (ULL), is augmented and superseded by this 2020 TEP.

1. The Authority will, to the extent possible, attempt to harmonize the BMP and the State-mandated Congestion Management Program (CMPs). To the extent they conflict, CMP activities shall take precedence over the GMP activities.

COMPONENTS

To receive its share of funding from the following categories:

- 2020 TEP Modernize Local Roads & Improve Access to Housing and Job Centers;
- Measure J Local Streets Maintenance & Improvements; and
- Measure J Transportation for Livable Communities (TLC);

each jurisdiction must:

1. Adopt a Growth Management Element (GME)

Each jurisdiction must adopt, or maintain in place, a GME as part of its General Plan that outlines the jurisdiction's goals and policies for managing growth and requirements for achieving those goals. The GME must show how the jurisdiction will comply with sections 2–9 below. The Authority will refine its model GME and administrative procedures in consultation with the Regional Transportation Planning Committees (RTPCs) to reflect the revised GMP.

Each jurisdiction is encouraged to incorporate other standards and procedures into its GME to support the objectives and required components of this GMP.

2. Adopt a Development Mitigation Program

Each jurisdiction must adopt, or maintain in place, a Development Mitigation Program to ensure that new growth is paying its share of the costs associated with that growth. This program shall consist of both a local program to mitigate impacts on local streets and other facilities, and a regional program to fund regional and subregional transportation projects, consistent with the Countywide Transportation Plan (CTP).

The jurisdiction's local Development Mitigation Program shall ensure that revenue provided from this measure shall not be used to replace private developer funding that has or would have been committed to any project.

The regional Development Mitigation Program shall establish fees, exactions, assessments, or other mitigation measures to fund regional or subregional transportation improvements needed to mitigate the impacts of planned or forecast development. Regional mitigation programs may adjust such fees, exactions, assessments or other mitigation measures when developments are within walking distance of frequent transit service or are part of a mixed-use development of sufficient density and with necessary facilities to support greater levels of walking and bicycling.

Each RTPC shall develop the regional Development Mitigation Program for its region, taking account of planned and forecast growth and the Multimodal Transportation Service Objectives (MTSOs) and actions to achieve them established in the Action Plans for Routes of Regional Significance. RTPCs may use existing regional mitigation programs, if consistent with this section, to comply with the GMP.

3. Address Housing Options

Each jurisdiction shall demonstrate reasonable progress in providing housing opportunities for all income levels as part of a report on the implementation of the actions outlined in its adopted Housing Element. The report will demonstrate progress by:

- Comparing the number of housing units approved, constructed or occupied within the jurisdiction over the preceding five years with the average number of units needed each year to meet the housing objectives established in the jurisdiction's Housing Element; or
- Illustrating how the jurisdiction has adequately planned to meet the existing and projected housing needs through the adoption of land use plans and regulatory systems which provide opportunities for, and do not unduly constrain, housing development; or
- Illustrating how a jurisdiction's General Plan and zoning regulations facilitate the improvement and development of sufficient housing to meet those objectives.

In addition, each jurisdiction shall consider the impacts that its land use and development policies have on the local, regional and countywide transportation system, including the level of transportation capacity that can reasonably be provided, and shall incorporate policies and standards into its development approval process that support transit, bicycle and pedestrian access in new developments.

4. Participate in an Ongoing Cooperative, Multi-Jurisdictional Planning Process

Each jurisdiction shall participate in an ongoing process with other jurisdictions and agencies, the RTPCs and the Authority to create a balanced, safe and efficient

transportation system and to manage the impacts of growth. Jurisdictions shall work with the RTPCs to:

- a. Identify Routes of Regional Significance and MTSOs or other tools adopted by the Authority for measuring performance and quality of service along routes of significance—collectively referred to as MTSOs—for those routes and actions for achieving those objectives;
- b. Apply the Authority’s travel demand model and technical procedures to the analysis of General Plan Amendments and developments exceeding specified thresholds for their effect on the regional transportation system, including on Action Plan objectives;
- c. Create the Development Mitigation Programs outlined in section 2 above; and
- d. Help develop other plans, programs and studies to address other transportation and growth management issues.

In consultation with the RTPCs, each jurisdiction will use the travel demand model to evaluate changes to local General Plans and the impacts of major development projects for their effects on the local and regional transportation system and the ability to achieve the MTSOs established in the Action Plans.

Jurisdictions shall also participate in the Authority’s ongoing countywide comprehensive transportation planning process. As part of this process, the Authority shall support countywide and subregional planning efforts, including the Action Plans for Routes of Regional Significance, and shall maintain a travel demand model. Jurisdictions shall help maintain the Authority’s travel demand modeling system by providing information on proposed improvements to the transportation system and planned and approved development within the jurisdiction.

5. Continuously Comply with an Urban Limit Line (ULL)

In order to be found in compliance with this element of the Authority’s GMP, all jurisdictions must continually comply with an applicable voter approved ULL. Said ULL may either be the Contra Costa County voter approved ULL (County ULL) or a locally initiated, voter approved ULL (LV- ULL).

Additional information and detailed compliance requirements for the ULL are fully defined in the ULL Compliance Requirements, which are incorporated herein.

Any of the following actions by a local jurisdiction will constitute non-compliance with the GMP:

- a. The submittal of an annexation request to the Local Agency Formation Commission (LAFCO) for lands outside of a jurisdiction’s applicable ULL.
- b. Failure to conform to the Authority’s ULL Compliance Requirements.

6. Develop a Five-Year Capital Improvement Program (CIP)

Each jurisdiction shall prepare and maintain a CIP that outlines the capital projects needed to implement the goals and policies of the jurisdiction’s General Plan for at least the following five-year period. The CIP shall include approved projects and an analysis of the costs of the proposed projects as well as a financial plan for providing the improvements. The jurisdiction shall forward the transportation component of its CIP to the Authority for incorporation into the Authority’s database of transportation projects.

7. Adopt a Transportation Systems Management (TSM) Ordinance or Resolution

To promote carpools, vanpools, and park-and-ride lots, each jurisdiction shall adopt a local ordinance or resolution that conforms to the model TSM ordinance that the Authority has drafted and adopted. Upon approval of the Authority, cities/towns with a small employment base may adopt alternative mitigation measures in lieu of a TSM ordinance or resolution.

8. Adopt Additional Growth Management Policies, as applicable

Each jurisdiction shall adopt and thereafter continuously maintain the following policies (where applicable):

- a. Hillside Development Policy;
- b. Ridgeline Protection Policy;
- c. Wildlife Corridor Policy;
- d. Creek Development Policy

Where a jurisdiction does not have a developable hillside, ridgeline, wildlife corridor or creek, it need not adopt the corresponding policy. An ordinance that implements the East Contra Costa Habitat Conservation Plan (HCP)/Natural Community Preservation Plan Act (NCCP) shall satisfy the requirement to have an adopted Wildlife Corridor Policy and Creek Development Policy. In addition to the above, jurisdictions with Prime Farmland and Farmland of Statewide Importance (FMMP) (as defined by the California Dept. of Conservation and mapped by FMMP)

within their planning areas but outside of their city/town shall adopt and thereafter continuously maintain an Agricultural Protection Policy. The policy must ensure that potential impacts of converting FMMP outside the ULL to other uses are identified and disclosed when considering such a conversion. The applicable policies are required to be in place by no later than July 1, 2022.

9. Adopt a Complete Streets Policy and Vision Zero Policy

Each jurisdiction shall adopt a Complete Streets Policy, consistent with the California Complete Streets Act of 2008 (AB 1358) and with the Authority's Complete Streets Policy, which accommodates all users of travel modes in the public right-of-way. Each jurisdiction shall also adopt a Vision Zero Policy which substantially complies with the Authority's Model Vision Zero Policy and reflects best practices for street design elements and programs to mitigate human error and quantifiably improve the traffic safety of all users in the planning, design and construction of projects funded with Measure funds. Jurisdictions shall document their level of effort to implement these policies, including during requests for funding, peer review of project design, and as part of the newly-added compliance requirement in the biennial GMP Checklist.

If the Authority determines that the jurisdiction complies with the requirements of the GMP, it shall allocate to the jurisdiction its share of 2020 TEP funding from the Fix and Modernize Local Roads category and its share of Measure J Transportation Sales Tax Expenditure Plan Local Streets Maintenance & Improvements funding. Jurisdictions may use funds allocated under this provision to comply with these administrative requirements.

If the Authority determines that the jurisdiction does not comply with the requirements of the GMP, the Authority shall withhold those funds and also make a findings that the jurisdiction shall not be eligible to receive Measure J TLC funds until the Authority determines that the jurisdiction has achieved compliance. The Authority's findings of noncompliance may set deadlines and conditions for achieving compliance.

Withholding of funds, reinstatement of compliance, reallocation of funds, and treatment of unallocated funds shall be as established in adopted Authority policies and procedures.

ALLOCATION OF FUNDS

Portions of the monies received from the retail transaction and use tax will be returned to the local jurisdictions (the cities/towns and County) for use on local, subregional and/or regional transportation improvements and maintenance projects. Receipt of all such funds requires compliance with the GMP and the allocation procedures described below. The funds are to be distributed on a formula based on population and road miles.

Each jurisdiction shall demonstrate its compliance with all of the components of the GMP in a completed compliance checklist. The jurisdiction shall submit, and the Authority shall review and make findings regarding the jurisdiction's compliance with the requirements of the GMP, consistent with the Authority's adopted policies and procedures.

Urban Limit Line (ULL) Compliance Requirements

Definitions—the following definitions apply to the GMP ULL requirement:

1. Urban Limit Line (ULL):

A ULL, urban growth boundary, or other equivalent physical boundary judged by the Authority to clearly identify the physical limits of the local jurisdiction's future urban development.

2. Local Jurisdictions:

Includes Contra Costa County, the 19 cities and towns within Contra Costa, plus any newly incorporated cities or towns established after July 1, 2020.

3. County ULL:

County ULL: A ULL placed on the ballot by the Contra Costa County Board of Supervisors, approved by voters at a countywide election, and in effect through the applicable GMP compliance period. The current County ULL was established by Measure L approved by voters in 2006.

The following local jurisdictions have adopted the County ULL as their applicable ULL:

City of Brentwood	Town of Moraga
City of Clayton	City of Oakley
City of Concord	City of Orinda
Town of Danville	City of Pinole
City of El Cerrito	City of Pleasant Hill
City of Hercules	City of Richmond
City of Lafayette	City of San Pablo
City of Martinez	City of Walnut Creek

4. Local Voter ULL (LV-ULL):

Local Voter ULL (LV-ULL): A ULL or equivalent measure placed on the local jurisdiction ballot, approved by the jurisdiction's voters, and recognized by action of the local jurisdiction's legislative body as its applicable, voter-approved ULL. The LV-ULL will be used as of its effective date to meet the Authority's GMP ULL requirement and must be in effect through the applicable GMP compliance period.

The following local jurisdictions have adopted a LV-ULL:

City of Antioch City of Pittsburg
City of San Ramon

5. Minor Adjustment:

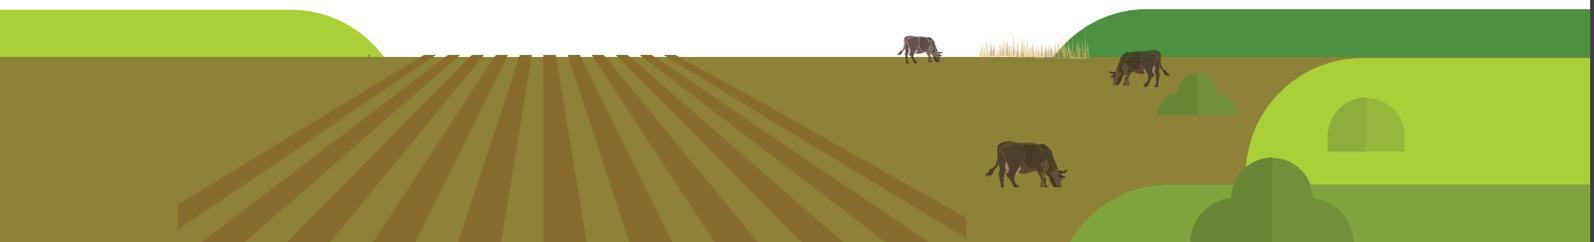

An adjustment to the ULL of 30 acres or less is intended to address unanticipated circumstances.

6. Other Adjustments:

Other adjustments that address issues of unconstitutional takings and conformance to State and Federal law.

REVISIONS TO THE ULL

1. A local jurisdiction which has adopted the County ULL as its applicable ULL may revise its ULL with local voter approval at any time during the term of the Authority's GMP by adopting a LV-ULL in accordance with the requirements outlined for a LV-ULL contained in the definitions section.
2. A local jurisdiction may revise its LV-ULL with local voter approval at any time during the term of the Authority's GMP if the resultant ULL meets the requirements outlined for a LV-ULL contained in the definitions section.
3. If voters, through a countywide ballot measure, approve a revision to the County ULL, the legislative body of each local jurisdiction relying on the County ULL shall:
 - a. Accept and approve its existing ULL to continue as its applicable ULL, or
 - b. Accept and approve the revised County ULL as its applicable ULL, or
 - c. Adopt a LV-ULL in accordance with the requirements outlined for a LV-ULL contained in the definitions section.
 - d. However, if any Countywide measure to approve a revision to the County ULL fails, then the legislative body of each local jurisdiction relying on the prior County ULL may accept and approve the existing County ULL.

4. Local jurisdictions may, without voter approval, enact Minor Adjustments to their applicable ULL subject to a vote of at least 4/5 of the jurisdiction's legislative body and meeting the following requirements:
 - a. Minor adjustment shall not exceed 30 acres.
 - b. Adoption of at least one of the findings listed in the County's Measure L (§82-1.018 of County Ordinances 200606 § 3, 91-1 § 2, 90-66 § 4) which include:
 - A natural or man-made disaster or public emergency has occurred which warrants the provision of housing and/or other community needs within land located outside the ULL.
 - An objective study has determined that the ULL is preventing the jurisdiction from providing its fair share of affordable housing, or regional housing, as required by State law, and the governing elected legislative body finds that a change to the ULL is necessary and the only feasible means to enable the County jurisdiction to meet these requirements of state law.
 - A majority of the cities/towns that are party to a preservation agreement and the county have approved a change to the ULL affecting all or any portion of the land covered by the preservation agreement.
 - A minor change to the ULL will more accurately reflect topographical characteristics or legal boundaries.
 - A five-year cyclical review of the ULL has determined, based on the criteria and factors for establishing the ULL set forth in Contra Costa County Code (Section 82-1.010), that new information is available (from city/town, or County growth management studies or otherwise) or circumstances have changed, warranting a change to the ULL.
 - An objective study has determined that a change to the ULL is necessary or desirable to further the economic viability of the East Contra Costa County Airport, and either (i) mitigate adverse aviation-related environmental or community impacts attributable to Buchanan Field, or (ii) further the County's aviation related needs; or
 - A change is required to conform to applicable California or Federal law.
 - c. Adoption of a finding that the proposed Minor Adjustment will have a public benefit. Said public benefit could include, but is not necessarily limited to, enhanced mobility of people or goods, environmental protections or enhancements, improved air quality or land use, enhanced public safety or security, housing or jobs, infrastructure preservation or other significant positive community effects as defined by the local land use authority. If the proposed Minor Adjustment to the ULL is proposed to accommodate housing or commercial development, said proposal must include permanent environmental protections or enhancements such as the permanent protection of agricultural lands, the dedication of open space or the establishment of permanent conservation easements.
 - d. The Minor Adjustment is not contiguous to one or more non-voter approved Minor Adjustments that in total exceed 30 acres.
 - e. The Minor Adjustment does not create a pocket of land outside the existing ULL, specifically to avoid the possibility of a jurisdiction wanting to fill in those subsequently through separate adjustments.
 - f. Any jurisdiction proposing to process a Minor Adjustment to its applicable ULL that impacts FMMP is required to have an adopted Agricultural Protection Ordinance or must demonstrate how the loss of these agricultural lands will be mitigated by permanently protecting farmland.
5. A local jurisdiction may revise its LV-ULL, and the County may revise the County ULL, to address issues of unconstitutional takings or conformance to State or Federal law.

CONDITIONS OF COMPLIANCE

1. Submittal of an annexation request of greater than 30 acres by a local jurisdiction to LAFCO outside of a voter-approved ULL will constitute non-compliance with the GMP.
2. For each jurisdiction, an applicable ULL shall be in place through each GMP compliance reporting period in order for the local jurisdiction to be found in compliance with the GMP requirements.

Transit Policy

VISION

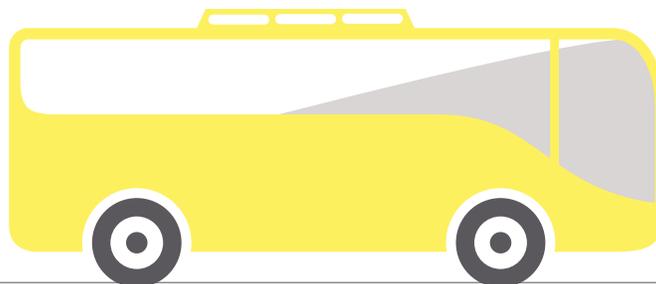

This Transportation Expenditure Plan (TEP) envisions a transportation system that provides reliable, safe, comfortable and convenient access for all users of the transportation system, regardless of mode choice and travel characteristics. The TEP further envisions a public transit system that provides convenient, safe, affordable and reliable service and offers an attractive alternative to private automobile usage. The Transit Policy Vision includes the infrastructure needed to accommodate a more robust transportation system for Contra Costa County that promotes greater use of transit and other shared mobility alternatives by prioritizing the movement of people rather than single-occupancy vehicles across the network. The TEP aims to improve transit countywide and reduce commute travel times, deliver more frequent and reliable service, expand transit service areas and provide better connections to and from transit by various modes of mobility options. Improving the coordination among transit operators and integrating the existing transit systems with new technological tools and platforms to enhance customer access and experience should increase the share of residents and employees who choose public transit. Doing so will reduce congestion, improve air quality, and will accommodate a growing population.

To achieve this vision, the TEP allocates more than one-half of the expected sales tax revenue to Transit and Alternative Modes and approximately one-quarter for local road improvements. In order to provide the maximum benefits to Contra Costa residents, the Contra Costa Transportation Authority (CCTA) adopts the following policies and principles for use of transit funds authorized in the TEP:

POLICY

1. The Policy shall promote Transit-First and guide the development of an Integrated Transit Plan (ITP). In the context of this Policy, Transit-First considers the following to provide a seamless and integrated transportation system:
 - a. Decisions regarding the use of limited public street and sidewalk space shall prioritize the use of public rights of way by pedestrians, bicyclists, and public transit, and shall strive to reduce traffic and improve public health and safety.
 - b. Transit-priority improvements, such as designated transit lanes and streets and improved signalization, shall be made to expedite the movement of public transit vehicles and to improve safety for people who bike and walk.
 - c. Pedestrian areas shall be enhanced wherever possible to improve the safety and comfort of pedestrians and to encourage travel by foot.
 - d. Bicycling shall be promoted by encouraging safe streets for riding, convenient access to transit, bicycle lanes, and secure bicycle parking.
 - e. Parking policies for areas well served by public transit shall be designed to encourage travel by public transit and alternative transportation.
 - f. The ability to reduce traffic congestion depends on the adequacy of regional public transportation. The cities/towns and county shall promote the use of transit and the continued development of an integrated, reliable, regional public transportation system.
 - g. The cities/towns and county shall encourage innovative solutions to meet public transportation needs wherever possible.
2. All transit operators that receive funding from the TEP shall participate in the development of an ITP to identify how to utilize funding to better coordinate and integrate transit services countywide. The ITP should guide how the TEP funding dedicated to Transit and Alternative Modes categories can be used to implement the Transit Policy Vision.
 - a. The ITP will be developed and managed under the leadership of CCTA and the County's transit operators. CCTA and the transit operators shall coordinate with transportation service providers in Contra Costa to inform the development of the ITP. Transit operators shall consult with the Regional Transportation Planning Committees (RTPCs) in developing the ITP.
 - b. The ITP will focus on delivering a streamlined and unified experience for the customer across all modes and transit operators, and should identify transit service investments (i.e. new routes, service hours,

- frequency), capital projects/assets (i.e. transit centers, bus stops, stop amenities, vehicles), and transit priority measures (i.e. transit signal priority, bus lanes, queue jumps) to be funded from the TEP.
- c. Transit operators, cities/towns and county shall coordinate regarding planned improvements for signal synchronization, Complete Streets and Vision Zero elements, as well as other locally-owned infrastructure investments that could benefit transit.
 - d. Prioritization for TEP funding should consider projects that can leverage other state, federal or local funding.
 - e. The ITP shall be updated at least every five years to address new technology opportunities, any changes in demand and other conditions.
3. Transit operators in Contra Costa County shall incorporate the findings and recommendations of the ITP pertinent to each operator's service area into their respective Short-Range Transit Plans (SRTP). The SRTPs shall be reviewed for consistency with the ITP associated with this TEP.
 4. Allocations pursuant to this TEP will be made in support of the recommendations in the ITP. Any recommendations in the ITP shall include performance measures to achieve continued funding.
 5. CCTA expects that transit operating funds from the TEP be used to support the vision of this policy. In the event that TEP funds must be used to support other transit services as a result of reduction of operating funds from other sources, the transit operator shall update its SRTP and submit to CCTA.
 6. CCTA expects that public agencies and transit operators leverage new and emerging technologies to improve service and to address first-mile/last-mile connections between transit stops and other traveler destinations. These technologies may include, but not be limited to, ride hailing partnerships, autonomous shuttles, shared mobility (bikes, scooters, cars), and mobility on demand platforms that best fit within each transit operators service area. The ITP should address how these technology services function within and among service boundaries and provide a seamless experience countywide for customers.
 7. CCTA expects that recipients of TEP funding create, analyze and seize opportunities for fare and schedule integration among transit operators and any technology services adopted. Focus should be placed on reducing inconveniences associated with transferring between services and on having a cost-effective universally accepted digital payment method. The ITP should address how Contra Costa transit operators can maximize benefits of fare payment and schedule integration.

Complete Streets Policy

VISION

This Plan envisions a transportation system and infrastructure in which each component provides safe, comfortable and convenient access for users of all ages and abilities. These users include pedestrians, bicyclists, transit riders, automobile drivers, taxis, Transportation Network Companies (TNCs) and their passengers, truckers, as well as people of varying abilities, including children, seniors, people with disabilities, and able-bodied adults. The goal of every transportation project is to provide safer, more accessible facilities for all users. All projects shall be planned, designed, constructed and operated to prioritize users' life safety and accommodate the Complete Streets concept.

By making streets more efficient and safer for all users, a Complete Streets approach will expand capacity and improve mobility for all users, giving commuters convenient options for travel and minimizing the need to widen roadways.

POLICY

To achieve this vision, all recipients of funding through this Plan shall consider and accommodate, wherever possible and subject to the exceptions listed in this Policy, the needs of all users in the planning, design, construction, reconstruction, rehabilitation and maintenance of the transportation system. This determination shall be consistent with the exceptions listed below. Achieving this vision will require balancing the needs of different users and may require reallocating existing Right-of-Way (ROW) for different uses.

The Authority shall revise its project development guidelines to require the consideration and accommodation of all users in the design and construction of projects funded with Measure funds and shall adopt peer review and design standards to implement that approach. The guidelines will allow flexibility in responding to the context of each project and the needs of users specific to the project's context and will build on accepted best practices for complete streets and context-sensitive design.

To ensure that this policy is carried out, the Authority shall prepare a checklist that sponsors of projects using Measure funds must submit which documents how the

needs of all users were considered and how they were accommodated in the design and construction of the project. In the checklist, the sponsor will outline how they provided opportunity for public input, in a public forum, from all users early in the project development and design process. If the proposed project or program will not provide context appropriate conditions for all users, the sponsor shall document the reasons why in the checklist, consistent with the following section on "exceptions" below. The completed checklist shall be made part of the approval of programming of funding for the project or the funding allocation resolution.

Recipients of 2020 TEP funding for Fix and Modernize Local Roads and Measure J TEP funding from Local Maintenance and Improvements shall adopt procedures that ensure that all agency departments consider and accommodate the needs of all users for projects or programs affecting public ROW for which the agency is responsible. These procedures shall:

1. Be consistent the California Complete Streets Act of 2008 (AB 1358);
2. Be consistent with and be designed to implement each agency's General Plan Policies once that plan has been updated to comply with the California Complete Streets Act of 2008 and the Authority's Complete Streets Policy;
3. Involve and coordinate the work of all agency departments and staff whose projects will affect the public ROW;
4. Consider the Complete Street design standards adopted by the Authority;
5. Be consistent with the adopted Local Jurisdiction Complete Streets Policy and Authority's Complete Street Policy herein;
6. Promote proactive data collection and traffic system monitoring using next generation technology, such as advance detection systems;
7. Provide opportunity for public review by all potential users early in the project development and design phase so that options can be fully considered. This review could be done through an advisory committee such as a Bicycle and Pedestrian Advisory Committee or as part of the review of the agency's CIP.

As part of their biennial GMP checklist, agencies shall list projects funded by the Measure and detail how those projects accommodated users of all modes by applying Transit, Complete Streets and Vision Zero Policies.

As part of the multi-jurisdictional planning required by the GMP, agencies shall work with the Authority and the RTPCs to harmonize the planning, design, and construction of transportation facilities for all modes within their jurisdiction with the plans of adjoining and connecting jurisdictions.

EXCEPTIONS

Project sponsors may provide a lesser accommodation or forgo Complete Street accommodation components when the public works director or equivalent agency official finds that:

1. Pedestrians, bicyclists, or other users are prohibited by law from using the transportation facility;
2. The cost of new accommodation would be excessively disproportionate to the need or probable use; or
3. The sponsor demonstrates that, such accommodation is not needed, based on objective factors including:
 - a. Current and projected user demand for all modes based on current and future land use; and
 - b. Lack of identified conflicts, both existing and potential, between modes of travel.

Project sponsors shall explicitly approve exceptions findings as part of the approval of any project using measure funds to improve streets classified as a major collector or above.¹ Prior to this project sponsors must provide an opportunity for public input at an approval body (that regularly considers design issues) and/or the governing board of the project sponsor.

¹ Major Collectors and above, as defined by the California Department of Transportation (Caltrans) California Road System (CRS) map.

Advance Mitigation Program

The Authority is committed to participate in the creation and funding of an Advance Mitigation Program (AMP) as an innovative way to advance needed infrastructure projects more efficiently and provide more effective conservation of our natural resources, watersheds and wetlands, and agricultural lands. As a global biodiversity hot spot, the Bay Area and Contra Costa County hosts an extraordinarily rich array of valuable natural communities and ecosystems that provide habitat for rare plants and wildlife, and that supports residents' health and quality of life by providing clean drinking water, clean air, opportunities for outdoor recreation, protection from disasters like flooding, landslides, and adaptation to climate change.

Assembly Bill No. 2087 (AB 2087) outlines a program for informing science-based, non-binding, and voluntary conservation actions and habitat enhancement actions that would advance the conservation of focal species, natural communities, and other conservation elements at a regional scale. The amp used AB 2087 and subsequent guidance to integrate conservation into infrastructure agencies' plans and project development well in advance and on a regional scale to reduce potential impacts of transportation projects, as well as to drive mitigation dollars to protect regional conservation priorities and protect important ecological functions, watersheds and wetlands, and agricultural lands that are at threat of loss. The AMP will provide environmental mitigation activities specifically required under the California Environmental Quality Act of 1970 (CEQA), National Environmental Policy Act of 1969 (NEPA), Clean Water Act Section 401 and Section 404, and other applicable regulations in the implementation of the major highway, transit and regional arterial and local streets and roads projects identified in the Plan. Senate Bill 1 (SB 1) (2017) created the AMP at Caltrans to enhance opportunities for the department to work with stakeholders to identify important project mitigation early in the project development process and improve environmental outcomes from mitigating the effects of transportation projects. The Authority's AMP compliments advance mitigation funding from SB 1.

The Authority's participation in an AMP is subject to the following conditions:

1. Development and approval of a Regional Conservation Investment Strategy (RCIS) that identifies conservation priorities and mitigation opportunities for all of Contra Costa County. The RCIS established conservation goals and includes countywide opportunities and strategies that are, among other requirements, consistent with and support the East Contra Costa Habitat Conservation Plan (HCP)/Natural Community Preservation Plan Act (NCCP). The RCIS will identify mitigation opportunities for all areas of the County to ensure that mitigation occurs in the vicinity of the project impact to the greatest extent possible. The Authority will review and approve the RCIS, in consultation with the RTPCs, prior to the allocation of funds for the AMP.
2. Development of a Project Impacts Assessment (PIA) that identifies the portfolio of projects to be included in the Advance Mitigation Program and the estimated costs for mitigation of the environmental impacts of the projects. The Authority will review and approve the PIA prior to the allocation of funds for the AMP. The PIA and estimated costs do not in any way limit the amount of mitigation that may be necessary or undertaken for the environmental impacts of the projects.
3. Development of the legislative and regulatory framework necessary to implement an AMP in Contra Costa County.
4. The identification of the Implementing Agency to administer the AMP for Contra Costa County or portions of the Bay Area including Contra Costa County.

The Authority will determine the amount of funds to be dedicated to this program following the satisfaction of the above conditions. Funds from the Plan will be allocated consistent with the Regional Conservation Assessment/ Framework to fund environmental mitigation activities required in the implementation of the major highway, transit and regional arterial and local streets and roads projects identified in the Plan. If this approach cannot be fully implemented, these funds shall be used for environmental mitigation purposes on a project by project basis. Mitigation required for future transportation improvements identified in the Plan are not limited by the availability of funding or mitigation credits available in the Program.

All projects funded from the TEP are eligible for inclusion in the AMP. Note that some projects are within the East Contra Costa County HCP / NCCP. The AMP provides an opportunity to meet species mitigation needs on projects that cannot be met by East Contra Costa County HCP/ NCCP.

Taxpayer Safeguards and Accountability

GOVERNING STRUCTURE

Governing Body and Administration

The Authority is governed by an Authority Board composed of 11 members, all elected officials, with the following representation:

- Two members from the Central County Regional Transportation Planning Commission (RTPC) also referred to as Transportation Partnership and Cooperation (TRANSPAC)
- Two members from the East County RTPC, also referred to as East County Transportation Planning Committee (TRANSPLAN)
- Two members from the Southwest County RTPC, also referred to as Southwest Area Transportation Committee (SWAT)
- Two members from the West County RTPC, also referred to as West County Contra Costa County Transportation Advisory Committee (WCCTAC)
- One member from the Conference of Mayors; and
- Two members from the Board of Supervisors

The Authority Board also includes three (3) ex-officio, non-voting members, appointed by the MTC, BART, and the Public Transit Operators in Contra Costa County.

The four subregions within Contra Costa: Central, West, Southwest and East County are each represented by a Regional Transportation Planning Commission (RTPC). Central County (TRANSPAC subregion) includes Clayton, Concord, Martinez, Pleasant Hill, Walnut Creek and the unincorporated portions of Central County. West County (WCCTAC subregion) includes El Cerrito, Hercules, Pinole, Richmond, San Pablo, and the unincorporated portions

of West County. Southwest County (SWAT subregion) includes Danville, Lafayette, Moraga, Orinda, San Ramon and the unincorporated portions of Southwest County. East County (TRANSPLAN subregion) includes Antioch, Brentwood, Oakley, Pittsburg and the unincorporated portions of East County.

Public Oversight Committee

The Public Oversight Committee (POC) shall provide diligent, independent and public oversight of all expenditures of Measure funds by Authority or recipient agencies (County, cities/towns, transit operators, etc.). The POC will report to the public and focus its oversight on the following:

- Review of allocation and expenditure of Measure funds to ensure that all funds are used consistent with the Measure;
- Review of fiscal audits of Measure expenditures;
- Review of performance audits of projects and programs relative to performance criteria established by the Authority, and if performance of any project or program does not meet its established performance criteria, identify reasons why and make recommendations for corrective actions that can be taken by the Authority Board for changes to project or program guidelines;
- Review of application of the Performance-based Review Policy;
- Review of the maintenance of effort compliance requirements of local jurisdictions for local streets, roads and bridges funding; and
- Review of each jurisdiction's GMP Checklist and compliance with the GMP Policies.

The POC shall prepare an annual report including an account of the POC's activities during the previous year, its review and recommendations relative to fiscal or

performance audits, and any recommendations made to the Authority Board for implementing the TEP. The report will be noticed in local media outlets throughout Contra Costa County, posted to the Authority website and made continuously available for public inspection at Authority offices. The report shall be composed of easy-to-understand language that is not produced in an overly technical format. The POC shall make an annual presentation to the Authority Board summarizing the annual report subsequent to its release.

POC members shall be selected to reflect community, business organizations and other interests within the County. The goal of the membership makeup of the POC is to provide a balance of viewpoints including but not limited to geography, age, gender, ethnicity and income status to represent the different perspectives of the residents of Contra Costa County. One member will be nominated by each of the four subregions with the RTPCs representing the subregion nominating the member. The Board of Supervisors will nominate four members, with each of these four members residing in and representing one of the County's four subregions. Eight members will be nominated by each respective organization detailed here, with each having one representative: League of Women's Voters, Contra Costa Taxpayers Association, East Bay Leadership Council, Building and Construction Trades Council, Central Labor Council, Paratransit Coordinating Council (PCC), Bike East Bay, and environmental and/or open space organizations operating in Contra Costa County (specific organization may vary during the life of the Measure). About one-half of the initial member appointments will be for two years and the remaining appointments will be for three-year terms. Thereafter, members will be appointed to two-year terms. Any individual member can serve on the POC for no more than 6 consecutive years.

POC members will be Contra Costa County residents who are not elected officials at any level of government or public employees from agencies that either oversee or benefit from the proceeds of the Measure. Membership is restricted to individuals with no economic interest in any of Authority's projects or programs. If a member's status changes so that he/she no longer meet these requirements, or if a member resigns his/her position on the POC, the Authority Board will issue a new statement of interest from the same stakeholder category to fill the vacant position.

The POC shall meet up to once a month to carry out its responsibility and shall meet at least once every 3 months. Meetings shall be held at the same location as

the Authority Board meetings are usually held, shall be open to the public and must be held in compliance with California's open meeting law (The Brown Act). Meetings shall be recorded and the recordings shall be posted for the public.

Members are expected to attend all meetings. If a member, without good reason acceptable to the Chair of the POC, fails to attend either (a) two or more consecutive meetings or (b) more than 3 meetings a year, the Authority Board will request a replacement from the stakeholder categories listed above.

The Authority commits to support the oversight process through cooperation with the POC by providing access to project and program information, audits, and other information available to the Authority, and with logistical support so that the POC may effectively perform its oversight function. The POC will have full access to Authority's independent auditors and may request Authority staff briefings for any information that is relevant to the Measure. The POC Chair shall inform the Authority Board Chair and Executive Director of any concern regarding Authority staff's commitment to open communication, the timely sharing of information, and teamwork.

The POC shall not have the authority to set policy or appropriate or withhold funds, nor shall it participate in or interfere with the selection process of any consultant or contractor hired to implement the TEP.

The POC shall not receive monetary compensation except for the reimbursement of travel or other incidental expenses in a manner consistent with other Authority advisory committees.

In order to ensure that the oversight by the POC continues to be as effective as possible, the efficacy of the POC Charter (i.e. this document) will be evaluated on a periodic basis and a formal review will be conducted by the Authority Board, Executive Director and the POC a minimum of every five years to determine if any amendments to this Charter should be made. The formal review will include a benchmarking of the Committee's activities and Charter with other best-in-class oversight committees. Amendments to this Charter shall be proposed by the POC and adopted or rejected by the Authority Board.

The POC replaces the Authority's existing Citizens Advisory Committee (CAC).

Advisory Committees

The Authority will continue the committees that were established as part of the Transportation Partnership Commission organization as well as other committees that have been utilized by the Authority to advise and assist in policy development and implementation. The committees include:

The RTPCs that were established to develop transportation plans on a geographic basis for sub-areas of the County, and

- The Technical Coordinating Committee (TCC) that will serve as the Authority's technical advisory committee;
- Paratransit Coordinating Council (PCC);
- The Countywide Bicycle and Pedestrian Advisory Committee (CBPAC);
- Bus Transit Coordinating Committee (BTCC)

IMPLEMENTING GUIDELINES

This TEP is guided by principles that ensure the revenue generated by the sales tax is spent only for the purposes outlined in this TEP in the most efficient and effective manner possible, consistent with serving the transportation needs of Contra Costa County. The following Implementing Guidelines shall govern the administration of sales tax revenues by the Authority. Additional detail for certain Implementing Guidelines is found elsewhere in this TEP.

Duration of the TEP

The duration of the TEP shall be for 30 years from July 1, 2020 through June 30, 2050.

Administration of the Plan

- 1. Funds only Projects and Programs in the TEP:**
Funds collected under this Measure may only be spent for purposes identified in the TEP, as it may be amended by the Authority governing body. Identification of Projects or Programs in the Plan does not ensure their implementation. As authorized, the Authority may amend or delete Projects and Programs identified in the Plan, including to provide for the use of additional federal, state and local funds, to account for unexpected revenue, to

maintain consistency with the current Contra Costa CTP, to take into consideration unforeseen circumstances, and to account for impacts, alternatives, and potential mitigation determined during review under the California Environmental Quality Act (CEQA) at such time as each project and program is proposed for approval.

- 2. All Decisions Made in Public Process:**

The Authority is given the fiduciary duty of administering the transportation sales tax proceeds in accordance with all applicable laws and with the TEP. Activities of the Authority will be conducted in public according to state law, through publicly noticed meetings. The annual budgets of Authority, strategic delivery plans and annual reports will all be prepared for public review. The interest of the public will be further protected by the POC, described previously in the TEP.

- 3. Salary and Administration Cost Caps:**

Revenues may be expended by the Authority for salaries, wages, benefits, overhead, and those services including contractual services necessary to administer the Measure; however, in no case shall the expenditures for the salaries and benefits of the staff necessary to perform administrative functions for the Authority exceed one percent (1%) of revenues from the Measure. The allocated costs of Authority staff who directly implement specific projects or programs are not included in the administrative costs.

- 4. Expenditure Plan Amendments Require Majority Support:**

The Authority may review and propose amendments to the TEP and the GMP to provide for the use of additional federal, state and local funds, to account for unexpected revenues, or to take into consideration unforeseen circumstances. Affected RTPCs will participate in the development of the proposed amendment(s). A majority of the Authority Board is required to approve an amendment and all jurisdictions within the County will be given a 45-day period to comment on any proposed TEP.

- 5. Augment Transportation Funds:**

Funds generated pursuant to the Measure are to be used to supplement and not replace existing local revenues used for transportation purposes. Any funds already allocated, committed or otherwise included in the financial plan for any project in the TEP shall be made available for project development and implementation as required in the project's financial and implementation program.

6. Jurisdiction:

The Authority retains sole discretion regarding interpretation, construction, and meaning of words and phrases in the TEP.

Taxpayer Safeguards, Audits and Accountability**7. Public Oversight Committee (POC):**

The POC will provide diligent, independent and public oversight of all expenditures of Measure funds by Authority or recipient agencies (County, cities/towns, transit operators, etc.). The POC will report to the public and focus its oversight on annual audits, the review and allocation of Measure funds, the performance of projects and programs in the TEP, and compliance by local jurisdictions with the maintenance of effort and GMP described previously in the TEP.

8. Fiscal Audits:

All funds expended by the Authority directly and all funds allocated by formula or discretionary grants to other entities are subject to fiscal audit. Recipients of Measure funds (including but not limited to County, cities/towns and transit operators) will be audited at least once every five (5) years, conducted by an independent CPA. Any agency found to be in non-compliance shall have its formula sales tax funds withheld, until such time as the agency is found to be in compliance.

9. Performance Audits:

All funding categories shall be subject to performance audits by the Authority. Each year, the Authority shall select and perform a focused performance audit on two or three of the funding categories, so that at the end of the fourth year all funding categories are audited. This process shall commence two years after passage of the new sales tax measure. Additional Performance Audits shall continue on a similar cycle for the duration of the TEP. The performance audits shall provide an accurate quantitative and qualitative evaluation of the funding categories to determine the effectiveness in meeting the performance criteria established by the Authority. In the event that any performance audit determines that a funding category is not meeting the performance requirements established by the Authority, the audit shall include recommendations for corrective action including but not limited to revisions to Authority policies or program guidelines that govern the expenditure of funds.

10. Maintenance of Effort (MOE):

Funds generated by the new sales tax Measure are to be used to supplement and not replace existing local revenues used for streets and highways purposes. The basis of the MOE requirement will be the average of expenditures of annual discretionary funds on streets and highways, as reported to the Controller pursuant to Streets and Highways Code Section 2151 for the three most recent fiscal years before the passage of the Measure where data is available. The average dollar amount will then be increased once every three years by the construction cost index of that third year. Penalty for non-compliance of meeting the minimum MOE is immediate loss of all 2020 TEP funding from Fix and Modernize Local Roads and Measure J TEP funding from Local Streets Maintenance and Improvements funds until MOE compliance is achieved. The audit of the MOE contribution shall be at least once every five years. Any agency found to be in non-compliance shall be subject to annual audit for three years after they come back into compliance.

Any local jurisdiction wishing to adjust its MOE requirement shall submit to the Authority a request for adjustment and the necessary documentation to justify the adjustment. The Authority staff shall review the request and shall make a recommendation to the Authority Board. Taking into consideration the recommendation, the Authority Board may adjust the annual average of expenditures reported pursuant to Streets and Highways Code Section 2151. The Authority shall make an adjustment if one or more of the following conditions exists:

- a. The local jurisdiction has undertaken one or more major capital projects during those fiscal years, that required accumulating unrestricted revenues (i.e., revenues that are not restricted for use on streets and highways such as general funds) to support the project during one or more fiscal years.
- b. A source of unrestricted revenue used to support the major capital project or projects is no longer available to the local jurisdiction and the local jurisdiction lacks authority to continue the unrestricted funding source.
- c. One or more sources of unrestricted revenues that were available to the local jurisdiction is producing less than 95 percent of the amount produced in those fiscal years, and the reduction is not caused by any discretionary action of the local jurisdiction.

d. The local jurisdiction Pavement Condition Index (PCI) is 70 or greater, as calculated by the jurisdiction Pavement Management System and reported to the MTC, and the jurisdiction has implemented its synchronized signals plan, and its Complete Streets, Vision Zero, and Transit First policies.

11. Annual Budget and Strategic Delivery Plan:

Each year, the Authority will adopt an annual budget that estimates expected sales tax receipts, other anticipated revenue and planned expenditures for the year. On a periodic basis, the Authority will also prepare a Strategic Delivery Plan which will identify the priority for projects; the date for project implementation based on project readiness and availability of project funding; the State, Federal and other local funding committed for project implementation, and other relevant criteria. The annual budget and Strategic Delivery Plan will be adopted by the Authority Board at a public meeting.

12. Requirements for Fund Recipients:

All recipients of funds allocated in this TEP will be required to sign a Master Cooperative Agreement that defines reporting and accountability elements and as well as other applicable policy requirements. All funds will be appropriated through an open and transparent public process.

13. Geographic Equity:

The proposed projects and programs to be funded through the TEP constitute a proportional distribution of funding allocations to each subregion in Contra Costa County. The subregional share of projected revenue is based on each subregion's share of the projected overall population in Contra Costa County at the midpoint of the measure. RTPCs must approve any revisions to the proportional distribution of funding allocations in the TEP and Strategic Delivery Plan.

Restrictions on Funds

14. Expenditure Shall Benefit Contra Costa County:

Under no circumstance may the proceeds of this transportation sales tax be applied for any purpose other than for transportation improvements benefiting residents of Contra Costa County. Under no circumstance may these funds be appropriated by the State of California or any other local government agency as defined in the implementing guidelines.

15. Environmental Review:

All projects funded by sales tax proceeds are subject to laws and regulations of Federal, State, and local government, including the requirements of the California Environmental Quality Act (CEQA). Prior to approval or commencement of any project or program included in the TEP, all necessary environmental review required by CEQA shall be completed.

16. Performance-based Project Review:

Before the allocation of any Measure funds for the construction of a project with an estimated cost in excess of \$10 million (or elements of a corridor project with an overall estimated cost in excess of \$10 million), the Authority will: 1) verify that the project is consistent with the approved CTP, as it may be amended, 2) verify that the project is included in the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS), and 3) require the project sponsor to complete a performance-based review of project alternatives prior to the selection of a preferred alternative. Said performance-based review will include, but not necessarily be limited to, an analysis of the project impacts on greenhouse gas (GHG) emissions, vehicle miles traveled (VMT), goods movement effectiveness, travel mode share, delay (by mode), safety, maintenance of the transportation system, other environmental effects and consistency with adopted Authority plans. The Authority may require the evaluation of other performance criteria depending on the specific need and purpose of the project. The Authority will expect project sponsors to identify and select a project alternative that reduces GHG emissions as well as VMT per capita. The Authority will also prioritize and reward high performing projects by leveraging additional regional and other funding sources. The Authority shall employ a public process to develop and adopt detailed guidelines for evaluating project performance and applying performance criteria in the review and selection of a preferred project alternative no later than October 1, 2022.

There will be additional performance-based reviews for actions in four categories of expenditure: Improve Walking and Biking on Streets and Trails; Countywide Major Road Improvement Program; Reduce Emissions and Improve Air Quality; and, Seamless Connected Transportation Options. The additional review guidelines are outlined in Sections 30-33 of these Implementing Guidelines.

17. Countywide Transportation Plan (CTP):

State law allows each county in the San Francisco Bay Area that is subject to the jurisdiction of the regional transportation planning agency to prepare a CTP for the County and cities/towns within the County. Both Measure C and Measure J also require the Authority to prepare and periodically update a CTP for Contra Costa County. State law also created an inter-dependent relationship between the CTP and regional planning agency. Each CTP must consider the region's most recently adopted Regional Transportation Plan (RTP) and Sustainable Communities Strategy (SCS) while the adopted CTPs must form the "primary basis" for the next RTP and SCS. The Authority shall follow applicable statutes and the most current guidelines for preparing the CTP, as established and periodically updated by the regional transportation planning agency. The Authority shall also use the CTP to convey the Authority's investment priorities, consistent with the long-range vision of the RTP and SCS.

18. Complete Streets:

The Authority has adopted a policy requiring all recipients of funding through this TEP to consider and accommodate, wherever possible, the needs of all users in the planning, design, construction, reconstruction, rehabilitation and maintenance of the transportation system. Achieving this vision will require balancing the needs of different users and may require reallocating existing ROW for different uses.

19. Compliance with the GMP:

If the Authority determines that a jurisdiction does not comply with the requirements of the GMP, the Authority shall withhold funds and also make a finding that the jurisdiction shall not be eligible to receive 2020 TEP funding from Fix and Modernize Local Roads and Measure J TEP funding from Local Streets Maintenance & Improvements funding until the Authority determines the jurisdiction has achieved compliance, as detailed in the GMP section of the TEP.

20. Local Contracting and Good Jobs:

Authority will develop a policy supporting the hiring of local contractors and businesses, including policy requiring prevailing wages, apprenticeship programs for Contra Costa County residents, and veteran hiring policy (such as the Helmets to Hardhats program).

21. New Agencies:

New cities/towns or new entities (such as new transit agencies) that come into existence in Contra Costa County during the life of the TEP may be considered as eligible recipients of funds through a TEP amendment.

22. Integrated Transit Plan (ITP):

The Authority has adopted a Transit Policy that envisions a public transit system which provides convenient, safe, affordable and reliable service that offers an attractive alternative to private automobile usage. In order to achieve this vision, the Authority and transit operators will develop an ITP to identify how Contra Costa County transit operators can utilize TEP funding to better coordinate and integrate their services. This ITP will focus on delivering a streamlined and unified experience for the customer across all modes and transit operators. Allocations pursuant to this TEP will be made in support of the findings and recommendations included in the ITP.

All transit operators who receive funding from the TEP shall participate in the development of an ITP. Transit operators shall consult with the RTPCs in developing the ITP, and cities, towns and the county, as applicable, regarding TEP funding for signal synchronization, complete streets and other investments that could benefit transit. Transit operators shall incorporate the findings and recommendations of the ITP their respective Short Range Transit Plans.

CCTA expects that transit operating funds from the Transportation Expenditure Plan be used to support new service, not to subsidize existing transit service. In the event that TEP funds must be used to subsidize existing services as a result of the reduction of operating funds from other sources or due to other financial concerns, the transit operator shall update its Short Range Transit Plan and notify the Authority.

23. Affordable Transportation for Seniors, Veterans, and People with Disabilities:

An Accessible Transportation Service (ATS) Strategic Plan will be developed and periodically updated during the term of the Measure. No funding under the Affordable Transportation for Seniors, Veterans, and People with Disabilities category will be allocated until the ATS Strategic Plan has been developed and adopted. No funds may be distributed to a service provider before it adopts the plan except as noted below. The development and delivery of the ATS Strategic Plan will focus on using mobility management to ensure coordination and efficiencies in accessible service delivery. The ATS Strategic Plan will address both Americans with Disabilities Act (ADA) and non-ADA services. The ATS Strategic Plan will evaluate the appropriate model for our local structure including how accessible services are delivered by all service

providers and where appropriate coordination can improve transportation services, eliminate gaps in service and find efficiencies in the service delivered. The ATS Strategic Plan will also determine the investments and oversight of the program funding and identify timing, projects, service delivery options, administrative structure, and fund leverage opportunities.

The ATS Strategic Plan will be developed by the Authority, in consultation with direct users of service, stakeholders representing seniors and people with disabilities who face mobility barriers, and non-profit and publicly operated paratransit service providers. Public transit operators in Contra Costa must participate in the ATS planning process to be eligible to receive funding in this category. The ATS Strategic Plan must be adopted no later than December 31, 2020. The development of the ATS Strategic Plan will not affect the allocation of funds to current operators as prescribed in the existing Measure J Expenditure Plan.

24. Safe Transportation for Youth and Children.

Prior to an allocation of funds from the Safe Transportation for Youth and Children category, the Authority will employ a public process to develop and adopt program guidelines and performance assessment procedures to maximize effectiveness. The guidelines and performance assessment may require provisions such as operational efficiencies, performance criteria, parent contributions, and reporting requirements. The guidelines will be developed in coordination with the RTPCs to develop the program that meets the needs within each subregion. Funding will be allocated to subregions and program funding will be subject to the publicized performance assessment conducted by Authority (see item 16 in this policy section). The development of the program guidelines and performance assessment procedures will not affect the allocation of funds to current programs as described in the existing Measure J expenditure plan.

25. Enhance Ferry Service and Rail Connectivity in Contra Costa County:

All projects funded in the Enhance Ferry Service and Commuter Rail in Contra Costa category will be evaluated by the Authority and demonstrate progress toward the Authority's goals of reducing VMT and GHG emissions. Selection of final projects to be based on a performance analysis of project alternatives consistent with Authority requirements. Proposed projects must be included in and conform with the ITP. Project sponsors requesting funding from this category will be required to prepare a feasibility and operations plan and submit to the Authority to demonstrate there sufficient funding is available to operate the proposed project and/or service.

26. BART Maintenance of Effort (MOE):

Prior to any appropriation, allocation or reimbursement of funds to BART, the Authority Board shall make a finding that BART has continued to use a proportional share of its operating allocations for capital projects. BART's preliminary FY 2019 Budget forecasts approximately \$150 million of its operating allocations to capital projects. BART shall demonstrate that it continues to use an equivalent proportional share of its operating revenues for capital projects allowing for normal annual fluctuations in capital projects or maintenance expenditures. In years where BART fare revenues or other general fund revenues are reduced by a decrease in ridership or unforeseen economic circumstances, loss of regional, State or Federal funding, or where one-time costs are increased by a natural disaster, then the Authority may release funds only if the Authority Board makes findings that 1) BART has not reduced its capital project funding disproportionately to the total operating revenue and 2) BART made best efforts to fund capital projects that benefit Contra Costa County.

27. Cleaner, Safer BART:

Prior to making an allocation of funds to BART for the Cleaner, Safer BART category, BART shall develop and submit a countywide plan to the Authority that proposes how these funds and other funds available to BART (including Measure RR, Regional Measure 3, and other funds) will be used as part of a system-wide effort to improve its stations to meet the goals described in the TEP. The funding from the Cleaner, Safer BART category will be used for improvements to stations in Contra Costa County and requires a minimum dollar-for-dollar match from other BART funds. The plan should document how a system-wide program to improve BART stations benefits Contra Costa residents who travel outside the county. BART should consult with the Authority, (in consultation with RTPCs) in the development of the countywide plan.

In the event BART completes the train control system and if BART has maintained the commitment to provide a minimum dollar-for-dollar match from other BART funds as describe above, the Authority (in consultation with RTPCs) and BART will jointly identify and the Authority may allocate funds for the acquisition of additional new BART cars to increase frequency during periods of high demand. The allocation will be considered in conjunction with a periodic review of the TEP (see item 37 in this policy section) and available funding capacity in the TEP.

28. Improve Local Access to Highway 4 and Byron Airport:

Prior to each allocation of funds from the Improve Local Access to Highway 4 and Byron Airport category, the Authority Board must make a finding that the project includes measures to prevent growth outside of the Urban

Limit Lines (ULL). Such measures might include, but are not necessarily limited to, limits on roadway access in areas outside the ULL, purchase of abutters' rights of access, preservation of critical habitat and/or the permanent protection/acquisition of agricultural and open space or performing conservation measures required to cover this project under the East Contra Costa County Habitat Conservation Plan/Natural Community Conservation Plan (HCP/NCCP). With the exception of the proposed new connection between Vasco Road and the Byron Highway, funding from this category shall not be used to construct new roadways on new alignments. The Authority will coordinate with Alameda and/or San Joaquin Counties relative to project improvements in those jurisdictions.

29. Modernize Local Roads and Improve Access to Housing and Jobs Centers:

Each jurisdiction in Contra Costa County will receive their share of 15% of annual sales tax revenues calculated using a base allocation of \$100,000 per year plus additional funds distributed based half on relative population and half on road miles within each jurisdiction. In addition, jurisdictions in Central, East and Southwest will receive their share of an additional allocation of 3% of annual sales tax revenue calculated using the same formula. Population figures used shall be the most current available from the State Department of Finance. Road mileage shall be from the most current information included in the Highway Performance Monitoring System (HPMS). Jurisdictions shall comply with the Authority's Maintenance of Effort (MOE) policy as well as Implementation Guidelines of this TEP. In addition to the requirements set forth in the Growth Management Program / Urban Limit Line Compliance policies and other applicable policies, local jurisdictions will report on the use of these funds, such as the amount spent on roadway maintenance, bicycle and pedestrian facilities, transit facilities, and other roadway improvements.

30. Countywide Major Roads Improvement Program:

Prior to an allocation of funds from the Improve Traffic Flow on Major Roads category, the Authority will develop a new Countywide Major Roads Improvement Program to address congestion relief on major roads within each subregion. The program guidelines will include information regarding how to evaluate the range of possible components. Implementation guidelines and standards will be developed in coordination with the RTPCs and approved by the Authority Board. Project funding is subject to a performance assessment conducted by Authority using approved and publicized guidelines with exception that the assessment will be required for any project over five million dollars or a series of related

projects which have cumulative costs exceeding five million dollars. Funds are allocated to subregions in the expenditure plan. If projects proposed by an RTPC do not meet performance standards, project is either modified or withdrawn in favor of another project from the same region. Funds in this category may be used for arterial refurbishment/redesign for transit first and complete streets. Projects funded from the Improve Traffic Flow on Major Roads must conform to the Transit, Complete Streets, Vision Zero and other related policies.

31. Improve Walking and Biking on Streets and Trails:

Prior to an allocation of funds from the Improve Walking and Biking on Streets and Trails category, the Authority will develop and adopt program guidelines and standards for a competitive project selection process. All projects will be selected through a competitive project selection process with the Authority approving the final program of projects, allowing for a comprehensive countywide approach while recognizing subregional equity based upon the proportional funding share shown in the TEP. Project funding is subject to a performance assessment conducted by Authority using approved and publicized guidelines (see item 30 in this policy section). Projects funded from this category must comply with the Transit, Vision Zero, and Complete Streets Policies and include complete street elements whenever possible.

Up to fifteen million dollars within each subregion for a total of sixty million dollars (\$60 million) will be allocated to Complete Street demonstration projects. Each demonstration project will be recommended by the relevant Regional Transportation Planning Committees and approved by the Authority prior to allocation of funds to demonstrate the successful implementation of Complete Streets projects no later than July 1, 2024. Each demonstration project will be required to strongly pursue the use of separated bike lane facilities to be considered for funding. The purpose of these demonstration projects is to create examples of successful complete street projects in multiple situations throughout the County.

Approximately one fifth of the funding is to be allocated to the East Bay Regional Park District (EBRPD) for the development, rehabilitation and maintenance of paved regional trails. EBRPD is to spend its allocation proportionally in each sub-region, subject to the review and approval of the conceptual planning/design phase by the applicable sub-regional committee, prior to funding allocation by the Authority. The Authority in conjunction with EBRPD will develop a maintenance-of-effort requirement for funds under this component of the funding category.

32. Reduce Emissions and Improve Air Quality:

Prior to an allocation of funds from the Reduce Emissions and Improve Air Quality category, the Authority will develop and adopt program guidelines and standards for a competitive project selection process. All projects will be selected through a competitive project selection process with the Authority approving the final program of projects, allowing for a comprehensive countywide approach while recognizing subregional equity based upon the proportional funding share shown in the TEP. Project funding is subject to a performance assessment conducted by Authority using approved and publicized guidelines (see item 30 in this policy section). Projects funded from this category must comply with the Transit, Complete Streets, Vision Zero, and other related policies.

33. Seamless Connected Transportation Options:

Prior to an allocation of funds from the Seamless Connected Transportation Options category, the Authority will develop and adopt program guidelines and standards for a competitive project selection process. All projects will be selected through a competitive project selection process with the Authority approving the final program of projects, allowing for a comprehensive countywide approach while recognizing subregional equity based upon the proportional funding share shown in the TEP. Project funding subject to performance assessment conducted by Authority using approved and publicized guidelines (see item 38 in this policy section). Projects funded from this category must comply with the Transit, Complete Streets, Vision Zero and other related policies.

Project Financing Guidelines and Managing Revenue

34. Fiduciary Duty:

Funds may be accumulated for larger or longer-term projects. Interest income generated will be used for the purposes outlined in the TEP and will be subject to audits.

35. Project and Program Financing:

The Authority has the authority to bond for the purposes of expediting the delivery of transportation projects and programs. The Authority will develop a policy to identify financing procedures for the entire plan of projects and programs.

36. Strategic Delivery Plan:

On a periodic basis, the Authority will develop a Strategic Delivery Plan to program revenue from the Measure to TEP projects and programs. The Strategic Delivery Plan will program Measure funds as a firm commitment and will consider the amount of Measure funds and additional leveraged funds available to the project or program, expected cost and cash-flow needs, and project

or program delivery schedule in programming Measure funds. Recipients of Measure funds may seek an allocation for projects and programs included in the Strategic Delivery Plan.

37. Periodic Review of the 2020 Transportation Expenditure Plan (TEP):

The Authority may review the TEP to consider updating the financial forecast due to changing economic conditions and adjust funding, if necessary, due to revenue shortfalls. The project and program categories may need to be adjusted based on progress made regarding meeting the commitments of the TEP. The review may determine to invest increased revenues in projects and programs deemed by the Authority to address transportation needs to best serve the residents of Contra Costa County. The review will provide the opportunity to adjust the TEP to adapt to the current state of transportation, leverage new funding opportunities, reflect changed conditions, and capture new opportunities that are becoming better defined. The Authority will review the TEP at a minimum of every 10 years. Any amendments to the TEP must comply with the policy for “Expenditure Plan Amendments Require Majority Support” and the following related policies.

38. Programming of Excess Funds:

Actual revenues may, at times be higher or lower than expected in this TEP due to changes in receipts. Additional funds may become available due to the increased opportunities for leveraging or project costs being less than expected. Revenue may be higher or lower than expected as the economy fluctuates. Determination of when the additional funds become excess will be established by a policy defined by the Authority. Funds considered excess will be prioritized first to the TEP projects and programs that are not fully funded and second to other projects deemed by the Authority to best serve the residents of Contra Costa County. Any new project or program will be required to be amended into the TEP pursuant to the “Expenditure Plan Amendments Require Majority Support” section above.

39. Reprogramming Funds:

Through the course of the Measure, if any TEP project becomes undeliverable, infeasible or unfundable due to circumstances unforeseen at the time the TEP was created, funding for that project will be reallocated to another project or program. The subregion where the project or program is located may request that the Authority reassign funds to another project category in the same subregion. In the allocation of the released funds, the Authority in consultation with the subregion’s RTPC will in priority order consider:

- a. A project or program of the same travel mode (i.e. transit, bicycle/pedestrian, or road) in the same subregion;
- b. A project or program for other modes of travel in the same subregion;
- c. Other TEP projects or programs, and
- d. Other project deemed by the Authority to best serve the residents of Contra Costa County.

The new project, program or funding level may be required to be amended into the TEP pursuant to the Expenditure Plan Amendments section above.

40. Development of Guidelines for Performance Based Projects Review and Programs:

The Transportation Expenditure Plan envisions creation of several procedures and guidelines to ensure that the goals of the TEP are achieved. To ensure high quality of the resulting guidelines and substantial public participation, the following procedure shall be used unless specifically replaced by the Authority.

1. Scope. The process explained below shall apply to the following guidelines and procedures described in the TEP.
 - a. Performance Based Project Review
 - b. Countywide Major Road Improvement Program
 - c. Safe Transportation for Youth and Children
 - d. Improve Walking and Biking on Streets and Trails
 - e. Reduce Emissions and Improve Air Quality
 - f. Seamless Connected Transportation Options
2. Master schedule and participation listing. Before December 31, 2020, the Authority shall publish, including on its website, a master list of when it expects to develop each of the guidelines and policies, hereafter referenced as either guidelines or policies. Individuals and organizations shall be able to register their interest in a guideline and shall subsequently receive advance notification from the Authority of the steps described below and encouragement to participate.
3. Semi-structured scoping. Authority staff shall request comments regarding the proper scope for each guideline in a format that encourages both free-form recommendations and preferences among options.
4. Initial draft and release for comments. Using the responses to the structured scoping effort and other applicable information, Authority staff shall develop an initial draft of the proposed policy. Following discussion at a public meeting and requested modifications, the Authority shall release the draft for comment from any interested party. The comment period shall be at least 30 days. Authority staff shall conduct outreach to the RTPCs, Public Oversight Committee, potential funding recipients, and interested parties to explain the draft policy and solicit comments.
5. Modification and adoption of revised policy. Authority staff shall revise the policy taking into consideration the goals of the TEP, other policies and comments received. The revised policy shall be presented to the Authority where it may be adopted or recirculated for further comments.
6. Policy guidelines. Each policy shall adhere to the following parameters.
 - a. Shall be designed to implement the overall guiding principles, goals, and policies of the TEP and the applicable funding category efficiently and effectively.
 - b. Shall utilize other regulations and reporting requirements for funding recipients as possible to avoid additional work.
 - c. Shall be designed to increase public confidence regarding the Authority and its actions.
 - d. Shall be written concisely in plain language.

Vision Zero Policy

VISION

In this Plan, the **Vision Zero policy is intended to eliminate traffic-related deaths and severe injuries** within Contra Costa County by prioritizing a system-wide safety approach to transportation planning and design. Principally, the Vision Zero policy treats personal mobility and accessibility as a fundamental activity of the general public, in order to attend school, conduct business, and visit friends and family free from the risk of physical harm due to traffic. This policy applies to all transportation system users including pedestrians, bicyclists, transit riders, micro-mobility users, automobile drivers, taxis, ride-hailing services and their passengers, and truckers, and people of varying abilities, including children, seniors, and people with disabilities. Implementation of the Vision Zero policy is intended to reduce societal costs due to loss of life and injury, lessen congestion stemming from non-recurring traffic collisions and incidents, and generally enhance quality of life in Contra Costa.

POLICY

Achieving this vision will require shifting the paradigm of traditional transportation planning and engineering such that life safety becomes the primary consideration in Measure-funded project and program evaluation. All recipients of funding through this Plan shall systemically incorporate street design elements that quantifiably reduce the risk of traffic-related deaths and severe injuries in the public right-of-way and accommodate the needs of all users in the planning, design, construction, reconstruction, rehabilitation and maintenance of the transportation system.

In consultation with local jurisdictions, the RTPCs, and the public, the Authority shall develop and adopt a Model Vision Zero Policy that reflects best practices for street design elements and programs to mitigate human error and quantifiably improve the traffic safety of all users in the planning, design and construction of projects funded with Measure funds. Key design elements of the Model Vision Zero Policy shall be incorporated into the

Authority's project development guidelines as appropriate. In order to be eligible to receive Measure funds, local jurisdictions must adopt a Vision Zero Policy that substantially complies with the Authority's Model Vision Zero Policy.

The Authority shall coordinate periodic traffic system and project monitoring with local jurisdictions and the RTPCs, and utilize data collected over time to evaluate the effects of Vision Zero implementation on public health and safety. Emphasis shall be placed on proactive deployment of next generation technology, such as advanced detection systems, at major intersections and corridors identified in regional and local plans as having high collision density. Funding for this level of effort shall be made available to local jurisdictions and RTPCs through the Countywide Major Road Improvement Program and funding from the Improve Traffic Flow on Major Roads.
